LAM PLAN, SERVICES

TESTING LABORATORY

Attentive to your need, we assist you regarding the process of defining and interpreting your expectations. The fine expertise of your demand combined to our best know-how enable us to shape a tailor made solution for you.

Take a virtual tour of our test centre on www.360en.lamplan.com

From the formal request to the detailed test report our CUSTOMER TEST CENTRE is at your disposal.

Always gather the best of your investments

By choosing LAM PLAN 's equipment, you will benefit the service and monitoring of our technicians. As a machinery and consumable manufacturer, we provide our entire experience and resources for your satisfaction.

Commissioning and Training

Our aim is for you to become immediately efficient and productive. We will train you in the use of the material and in the implementation of the included consumables.

Preventive Maintenance

LAM PLAN offers you punctual preventive maintenance tasks or annual contracts designed for each machine. We provide regular monitoring of your machines profiting an optimised management of maintenance costs, minimising the frequencies of failures.

The curative maintenance

In case of a failure which would cause the cessation of your production, the rapidity of reaction is preeminent. It mostly lays on the quality of the diagnosis and the availability of replacement parts. These curative maintenances are operated for all LAM PLAN's machinery.

The Retrofit

Retrofit maintenances include the upgrade of old equipment in order to prolong their use or to comply with new standards.

We also assure you the installation of optional equipment to improve your material and adjust it to your requirements.

FROM INNOVATION TO DESIGN AND MANUFACTURING

Your requirements are a constant source of innovation. The LAM PLAN technical team addresses all challenges and attempts to respond to specific issues in a simple way, that remains safe and comfortable to handle.

Our constant renewed ability to improve our machines, supports and products, combined with our original know-how, enable us to respond to all demands.

Lapping, polishing, metallography: mastering these 3 lines of business empowers us to respond the most varied customer demands. Our know-how is spread into each distinct sector, through an overview of the volume of solutions.

Supports

Plates, rods, abrasive discs, polishing pads, we develop a full range of supports making it possible to reach any surfaces and remove the required matter.

Abrasive solutions

Preparations in the form of pastes and liquids, conventional and diamond abrasives, we develop formulations that respect the health of users and preserve the environment without compromising efficiency.

Machines

Whether your needs go for lapping, polishing or metallography, our range of machines and peripheral devices offer you a complete equipment to treat all type of parts.

Quality assurance

The ISO 9001 certification constitutes the base of our approach to perpetual enhancement and concern about customer's needs, which enables us to respond to it properly. This certification of quality management within our organisation guarantees a permanent monitoring of our system's performance, quality of our products and services. Our goal: The customers' satisfaction.

ENVIRONMENT ECO-COMMITMENT CHARTER

LAM PLAN is pursuing and maintaining its research and development efforts in favour of the technique and the environment.

Our innovations contribute to the improvement of our products and technologies by rendering them more effective, while reducing their impact on the environment and limiting the risks to user health. This responsible and intentional approach is an integral part of our continuous improvement policy.

This choice allows our customers today to anticipate international regulations in terms of occupational safety and ecology.

Thanks to our developments, we are committed to offering you innovative products which allow reconciling performance, quality, safety and respect of future generations.

By way of our values, we assert our commitment to responsible and sustainable business practices.

ECO-COMMITMENT CHARTER

The Eco-commitment approach aims to promote the preservation of the environment and the health of users through the integration of biotechnologies into our product ranges.

ENVIRONMENTAL APPROACH

The Eco Engagement approach aims to promote the preservation of the environment and the health of users through the integration of biotechnologies into our product ranges.

A real strategic industrial and societal issue, the environmental concern is a fact now present at all stages of the design and production of our solutions.

First in line with the Eco Commitment initiative, the Bio DIAMANT® and No-VOC labels sign off on the success of our research and development teams.

Biotechnology-derived, BioDIAMANT® branded super-fine diamond abrasives meet demanding criteria for the protection of the environment and users:

- // Biodegradable and safe for the environment**
- // Not dangerous, toxic, harmful or irritating to users**
- // More effective than traditional diamond products**
- // In accordance with the European directives in force.**

Anxious to protect the environment, the label «Without VOC*» is the guarantee of a work done safely for the operators.

Pioneering in the implementation of formulations of this type, LAM PLAN intends to continue its efforts to make all of its preparations ever safer, without changing anything to their effectiveness. The commitment of the «No VOC» label:

- // Respect the user and the environment**
- // Promote the ISO 14000 approach at our customers**
- // Meet the legal requirements on VOC emissions.**

* Volatile organic compounds

CUTTING

CUTTING MACHINES

CUTLAM®micro 1.1

MADE IN FRANCE

The CUTLAM®micro 1.1 is a LAM PLAN laboratory micro-cutting machine. Easy to use and economical. It is designed for precision cuts of the most sensitive materials.

The CUTLAM®micro 1.1 allows you to include a versatile and robust machine in your laboratory at a reasonable budget. Its speed range and cutting chamber capacity will enable you to use it for many applications with a variety of cutting wheels (diamond, Al_2O_3 , etc.) up to 150 mm diameter.

The work piece is held by a vice-holding, the knob, located outside of the cutting chamber, which permits a micro metric movement of the Z-axis.

The cutting feed is controlled with a sliding weight system, allowing you to fine-tune the load applied for delicate and slow cuts.

Equipped with an independent decanting/ recirculation tank, you can easily make slow cuts in optimum conditions of cooling.

Based on a robust aluminium frame with a painted metal body, the CUTLAM®micro 1.1 is stable and vibration free. The hinged transparent hood avoids any spraying outside the machine and allows easy access for clamping vices on the arm. The hood is fitted with a safety device which stop immediately the cutting wheel motor in case of an opening.

CUTLAM®micro 1.1

Laboratory micro cutting machine
Ø 150 mm

Recirculation coolant system, 10 litres

Included Equipment

Recirculation coolant system, 10 litres

Cylindrical sample holder with clamping screw: Ø 12 to 50 mm maxi

Small vice with clamping screw: Ø 12 mm 60 CTM02 10

Technical data	CUTLAM®micro 1.1
Wheel Ø	75 to 150 mm
Shaft Ø	12,7 mm
Standard flanges Ø	50 mm
Lateral arm displacement	Stroke 25 mm (accuracy 0,02 mm)
Preload weight	1 x 200 g
Vertical movement	Manual
Lubrication/Cooling	Recirculation system, 10 litres, 800 L/ hour pump driven by the machine
Motor power	0,18 kW
Rotational speed	Variable, from 50 to 1500 rpm
Body	Steel coated with epoxy paint
Protection	Transparent cover with locking system
Voltage	230 V - 50 Hz single phase
Dim. W x H x D	390 x 390 x 340 mm (H cover open: 630 mm)
Weight	25 kg
Reference	60 CTM10 00

Faced with the constant evolution of the materials and the quality standards, LAM PLAN is a reference partner for the preparation of the samples for the metallographic analysis.

Our technical solutions and our customised methods will ensure you reliable and reproducible results. We are fully committed to the quality of the samples.

CUTTING MACHINES

CUTLAM®micro 2.0

MADE IN FRANCE

The CUTLAM®micro 2.0 is a compact laboratory micro-cutting machine intended for the most sensitive materials. The speed range and cutting chamber capacity make this machine incredibly versatile.

The sample is held in position using a vice-tightened holding arm and the wheel located outside the cutting chamber enables a micrometric movement along the Z axis; the movement can be tracked directly on the screen (accurate to 0,02 mm) Thanks to the zeroing system, very accurate parallel cuts can be performed.

A wide range of vices is available, enabling you to clamp any type of component or material. The cutting progress is either controlled manually or with a counterweight system specially adapted for delicate cuts. A rocker arm balances the implement weight, and another one permits to adjust the applied load with precision.

Fitted with a large-capacity (10 litres, large for the machine's size), independent filtration/decanting/recirculation tank, it is easy to perform long cuts under ideal cooling conditions. The CUTLAM®micro 2.0 has been designed to simplify maintenance and cleaning operations, the base of the cutting chamber is equipped with an inlet filter to prevent the loss of small parts and components. A 100 µm fabric filter at the decanter inlet filters out the largest particles, and the remainder of the filtration is accomplished by decanting into a compartmented tank.

Built upon a robust, mechanically welded chassis sheathed with a painted sheet-steel body, the CUTLAM®micro 2.0 is particularly stable and is not prone to vibration, saving you valuable laboratory work space.

Technical data	CUTLAM®micro 2.0
Wheel Ø	75 to 200 mm
Shaft Ø	12,7 mm
Standard flanges Ø	50 mm
Lateral arm displacement	Stroke 80 mm (accuracy 0,02 mm)
Preload weight	2 x 200 g
Vertical movement	Manual
Motor power	0,6 kW
Rotational speed	Variable, from 200 to 4000 rpm
Protection	Transparent cover with locking system
Touch screen 3,5"	Intuitive and graphic interface
Voltage	230 V - 50 Hz single phase
Dim. W x H x D	430 x 300 x 450 mm (H cover open: 644 mm)
Weight	40 kg
Reference	60 CTM20 00

**CUTLAM®micro 2.0**

Cylindrical sample holder with clamping screw: Ø 12 mm to 50 mm 60 CTM03 10

Small vice with clamping screw: Ø 12 mm 60 CTM02 10

Medium vice with clamping screw: Ø 24 mm 60 CTM021 10

CUTLAM® micro 3.0

The CUTLAM® Micro 3.0 is designed for laboratories looking for an automatic machine adapted to high precision, long and difficult cuts.

This benchtop designed cutting machine offers astonishing capacities. Thanks to the multiple motion table, the cutting wheel, and the feed speed control system according to the cutting torque, this machine will overcome any difficult task.

Large capacity compact cutting machine

It is fitted with a large: 320 x 540 mm chamber, and equipped with a grooved aluminium table, sized 210 x 210 mm, and stainless steel interchangeable pallets.

The large capacity of the CUTLAM® micro 3.0 relies on the use of 200 mm cut-off wheel, combined with a vertical movement range of 100 mm (Z axis) and a longitudinal range of 270 mm (Y axis).

Precision

The positioning of the axes, which can be seen on the screen is 0,01 mm accurate and feed speed while cutting can be set from 0,1 to 20 mm/sec or 0,1 to 10 mm/sec.

The use of the "smart motion" (read the following page about this device) will automatically reduce the moving of the axes in order to obtain a minimum value of 0,02 mm/sec.

User-friendly interface

A large touch-screen allows you to select the different functions using an easy to use, intuitive interface. All the positioning and cutting parameters can continuously be visible on the screen. The use of a joystick allows a fast positioning of the cut-off wheel; while in automatic and semi-automatic modes, an estimation of the remaining cutting time appears.

Three cutting modes are available: manual, semi-automatic and automatic.

*optional 3rd (X)

300 programs can be stored in the built-in memory, including: start position, feed speed, rotational speed, cutting mode.

Theoretical cutting capacity - Ø 200 mm *space under wheel

CUTTING MACHINES

Efficiency: 5 key points for higher productivity

1. Powerful motor of 1,1 kW.
2. Sequential cutting mode for a maximum cooling.
3. Ingenious feed speed control:
 - The feed speed is pre-set, and will be automatically reduced if the load on the cutting wheel increases. The pre-set speed returns when the load on the wheel decreases.
 - It improves the quality of the cut by limiting the heat damages on the samples.
 - Suitable for irregular samples and/or materials with heterogeneous hardness.
 - It prevents the wheel from breaking in case of overload.
 - It allows you to always work at maximum speed without any risk of damage.
4. Optional cross-feed table (X axis) manual or motorised for repetitive parallel cuts.
5. Independent lubrication/cooling system, composed of a 100 µ washable filter, and a 30 litres sedimentation tank with multi-point nozzle, insures excellent cooling of the sample and the cutting wheel even during intensive use.

Options

Manual cross-feed table (X axis) to cut parallel sections stroke 55 mm accurate to 0,01 mm	60 CTM31 00
Motorised cross feed table (X axis) to cut parallel sections stroke 50 mm, accurate to 0,01 mm	60 CTM34 00
Positioning laser	60 CTM35 00

Technical Data	CUTLAM®micro 3.0

CUTLAM[®] 1.1

Manual cutting machine
vertical motion

Theoretical cutting capacity - Ø 305 mm

**space under wheel*

CUTLAM[®] 1.1

MADE IN FRANCE

The CUTLAM[®] 1.1 is a bench-mounted cutting machine for a wide range of applications. Robust and easy to use, with a deported motor design, this machine has a very large cutting capacity. It allows you to equip your laboratory with a simple, versatile and reasonably-priced machine made from high-quality components.

This machine offers a spacious cutting table, made of treated anti corrosive cast iron. It is also easy to handle with a fully opening cover and remote motor. The 4 perpendicular grooves enable you to clamp components of thicknesses up to 120 mm. The CUTLAM[®] 1.1 can be equipped with Ø 250 to 305 mm cut-off wheels.

Fitted with a speed adjuster and a powerful 3.8 Kw motor particularly adapted to Ø 305 mm wheels, the CUTLAM[®] 1.1 is perfect for intensive use.

The high-capacity recirculation system with pre-filter and de-canter compartments ensures optimum lubrication and cooling by a multi-point spray.

The cutting chamber is illuminated by a strong and trendy aluminium projector.

The protection cover is made of two parts: a large glass area, giving a complete visibility on the cutting chamber, and a lacquered metallic belt offering a high resistance to this protection core. Furthermore, thanks to an interlocking system, this cover locks itself when the wheel is in rotation.

This machine is offering 2 lateral openings, giving the possibility of cutting bars which have a 60 mm diameter.

An external shower head combined with a tilted cutting chamber base makes cleaning easy, and an inlet filter ensures that your samples do not fall down the large-diameter outlet pipe.

Technical Data	CUTLAM [®] 1.1
Wheel Ø	250-305 mm
Shaft Ø	25,4 mm

CUTTING MACHINES

Example of application: cutting of a sphere

One of the recurrent issues remaining in the cutting processes is the clamping of spherical parts. The implementation of this kind of vice on the CUTLAM® 1.1 enables to cut spheres having a diameter going from 30 mm to 60 mm.

**Example of application: cutting of a glass cylinder with double wheel**

Tooling allowing the removal of a 3 mm slice from a glass cylinder Ø 50 mm, height 50 mm. This article includes the supply and installation of a specific clamp and a double grinding wheel on a CUTLAM® 1.1 machine.

Dimensions W x H x D: 700 x 800 x 1050 mm.
Reference: 60 M0310 00

CUTLAM® 3.1

The CUTLAM®3.1 is the ultimate development of LAM PLAN and is the most advanced automatic \varnothing 300 mm cut-off machine in its market sector.

Largest cut-off area on the market of \varnothing 300 mm cut-off machines

The CUTLAM®3.1 offers an unprecedented cutting capacity, the machine table can move forward and backward automatically over a distance of 300 mm. New, the cut-off wheel has an automatic and linear top-to-bottom movement. With this linear movement, this new-generation of cutting machine offers a 140 mm space under the cutting wheel. The CUTLAM®3.1 has a cover which includes opening side to cut bars.

Easy to use

The CUTLAM®3.1 is extremely simple to operate with its large touch screen (5.7 inches) and intuitive interface. The 2 motorised axes of CUTLAM®3.1 (optional 3rd axis) can be controlled manually by two joysticks located near the control screen. The internal memory allow to save over 300 cutting programs, which can also be imported or exported via a USB port.

A great variety of possible setting configuration

The rotation speed of the cutting wheel and the feed speed of the axes can be programmed so as to prevent any deterioration or deformation of the samples. 3 cutting modes are possible: manual (via joysticks), semi-automatic and automatic. The movements of the axes can be continuous or sequenced.

The CUTLAM®3.1 is also equipped with the smart motion function: the definition of an acceptable torque for the cutting wheel, with the touch screen will automatically regulate the feed speed of the axes.

This option makes it possible to cut materials with different hardnesses (e.g. steel with an HVOF coating) without having to modify the feed speed. This option allows to avoid long testing campaigns to define the correct feed speed.

CUTLAM® 3.1
Automatic and programmable cutting machine with 2 or 3 motorised axes*, equipped with a 300 mm \varnothing cut-off wheel

*Optional motorised 3rd Axis (X)

Theoretical cutting capacity - \varnothing 300 mm

*space under wheel

Height cut piece to be cut in mm

CUTTING MACHINES

Many cutting possibilities are offered

This automatic cut-off machine makes it possible to cut vertically (along axis Z), over a maximum stroke of 200 mm, or to cut horizontally along axis Y, over a maximum stroke of 300 mm.

It is also possible to combine the two Z and Y movements. Thus, your machine will be able to perform cutting passes with a pass number and depth, which can be programmed.

This machine can optionally be equipped with a manual or automatic X axis for cutting parallel sections.

**Your safety, our priority**

An interlocking device maintains the cover in its closed position when the cutting wheel is rotating. When the cover is open, any axes movement (controlled by the joysticks) is only possible when the technician presses the "man present" button.

Technical Data	CUTLAM®3.1
Wheel Ø	250 to 305 mm
Shaft Ø	25,4 mm
Max cutting capacity	Ø 110 mm
Space between the cutting wheel and the table (with wheel Ø 300 mm)	140 mm
Table	Stainless steel 574 x 298 mm
Longitudinal movement - table	300 mm
Vertical movement - wheel	200 mm
Transversal movement	150 mm (optional)
Motor power wheel	3,8 kW
Cooling/Lubrication	Recirculation system, 60 litres decantation tank, 2 chambers, Input 100 µm filter, 800 L/hour pump driven by the machine
Wheel rotation speed	From 1000 to 4000 rpm
Cutting mode	Manual, semi-automatic, automatic
Feed speed control	From 0.1 to 20 mm/s, continuous or sequenced. Intelligent motion: automatic check of the feed motion according to the resulting torque on the cutting wheel motor
Lighting	LED strip
Protection	Cover secured by interlocking Man present button for operating the axes when the cover is open
Voltage	400 Volts - 50 Hz (three-phase + ground)
Dim. W x H x D	900 x 700 x 1000 (H. cover open 1100 mm)
Weight	210 kg
Reference	60CT30100

Support cabinet with integrated cooling system (60 litres).

CUTLAM® 4.0

MADE IN FRANCE

The CUTLAM®4.0 is designed especially for manufacturing companies with high standards who are looking for high-quality and reliable equipment for heavy-duty use with a great cutting capacity.

The CUTLAM®4.0 is a pedestal-mounted single-block machine with an integrated recirculation/decanter tank. The wheel's vertical descent can be controlled automatically (oleo pneumatic) or manually using the joystick. The maximum cutting descent is 240 mm.

Adapted for intensive use on heavy components, the CUTLAM®4.0 is fitted with a powerful 5.5 kW motor.

The wheel's speed is adjustable from 1000 to 4000 rpm, the feed speed is adjustable. 2 cutting modes are available: sequential automatic with adjustable frequency or continuous.

An end of cycle sensor shuts off the machine and automatically raises the wheel after each operation.

The controls are easy to use and intuitive: they are centralized on the 5.7" arm-mounted touch-screen.

The cover opening clears 3 sides, guaranteeing easy loading of heavy or bulky parts. Removable gates to the left and right enable you to cut long bars.

The wide cast-iron clamp bench has 6 T-longitudinal grooves and 5 transversal grooves, and as an optional extra may be made mobile along the X and the A axes.

The multi-point hose over the wheel and part ensures optimum cooling for high-quality cuts and consistent results.

In the standard configuration, the work area is illuminated by a adjustable spotlight, and an external shower head is provided for cleaning the cutting area.

In order to optimise your equipment according to your needs, a variety of accessories and optional extras are available.

CUTLAM^{5.0}

High-capacity 2 or 3 axes programmable automatic cutting machine

Theoretical cutting capacity - Ø 355 mm

*space under wheel

A spacious cutting chamber: W 408 x D 422 mm
with openings on both right and left sides for the cutting of long samples.

CUTLAM^{5.0}

MADE IN FRANCE

The CUTLAM^{5.0} is a pedestal-mounted machine with an integrated recirculation/decanter tank. It represents the ultimate equipment in terms of high-capacity programmable automatic cutting machines. Power and advanced control of the cutting steps will guarantee first class efficiency and productivity.

Wheel and table movements

Fitted in standard with a Ø 355 mm wheel, which produces an automatic vertical and longitudinal movement.

The automatic transverse movement is carried out by an optional cross-feed table.

Controls

Programming is performed via a large touch screen with a graphical interface that ensures you an intuitive use. Cutting parameters are continuously visible on the screen. Fast positioning of the cutting point is provided by the use of a joystick.

The internal memory allows you to store 300 programs that can be transferred via USB.

Easy programming

Depending on the location of the sample on the table, and on its dimensions, the screen will indicate the various necessary and possible moves in order to complete the cut. This data can then be saved.

All cutting modes are possible

- Automatic or manual cutting.
- Continuous automatic cutting with ingenious feed speed control:

The feed speed is pre-set, and will be automatically reduced if the load on the cutting wheel increases. The pre-set speed returns when the load on the screen decreases.

It improves the quality of the cut by limiting the thermal damages over the samples.

It is suitable for irregular samples and/or material with heterogeneous hardness.

It prevents the wheel from breaking in case of overload.

It allows you to work at maximum speed without any risk of damage.

- Automatic sequential cutting for maximum cooling.
- Plunge cutting, horizontal feed cutting and oscillating cutting.
- Repetitive parallel cutting.

Work area lit
by LED strip

CUTTING MACHINES

Equipments

A high-capacity, independent cooling/recirculation system (140 litres) is located under the machine. The multipoint nozzles insure excellent cooling of the sample and the cutting wheel even during intensive use.

Fast cleaning is made possible thanks to an exterior shower head and a carefully designed cutting chamber.

The wide cutting table: W 408 x D 422 mm is composed of two independent parts. 4 longitudinal grooves and 6 transversal grooves that allow to fix all kind of clamping systems available as options or on the market.

Technical Data	CUTLAM*5.0
Wheel Ø	355 mm (400 mm optional)
Shaft Ø	25,4 mm
Standard flanges Ø	100 mm

Oil mist extraction device

NEW

A1

The LAM PLAN vacuuming system extracts the "polluted" air inside the cutting chamber of your cutting machine.

A special multilayer filter will stop the smallest polluting particles, thus preventing their dispersion into the atmosphere. The cutting fluid, in the liquid state, is returned to the cutting machine recirculation tank to be reused. (An evacuation is provided for this purpose on the vacuuming system).

A cartridge post-filter, located above the suction system, ensures a high filtration level, up to 99.97%.

An adapter part (LAM PLAN code 60CT20820) is provided to adapt the suction hose to the canopy of the LAM PLAN cutting machine.

The vacuuming system is mounted on a trolley with wheels, allowing an easy positioning.

A drain valve, located in the trolley, collects the condensate.

Technical features	Oil mist extraction device A1
Max flow air	245 m ³ /hour
Noise level	61 dBa
Rotation	2810 rpm
Height	1180 mm

Refractometer

The refractometer is a measuring instrument which allows you to control the cutting fluid concentration in the machine to assure the quality of the cuts, to avoid the corrosion on the cut parts, the table and vices. It also controls heating during cuts (no smokes) and prevent from microbial and smells in the machine. The measured values are in BRIX degrees.

Refractometer	1	60 CT900 10

Cutting fluid series 723

NEW

Lubricating the cutting action

LAM PLAN cutting fluid 723 is a synthetic water-miscible coolant that has been approved for sectioning non-ferrous metals. This fluid provides excellent lubrication and optimal cooling so that the material's microstructures are not damaged during the cutting process. The cooling efficiency of cutting fluid 723 avoids overheating while lubricating the cutting action. It also has an optimum viscosity enabling it to flow freely.

Thanks to this fluid the cut parts and the materials will be protected from corrosion.

It does not lather. For an optimal use, we advise you to dilute 5 % of the solution in water or 3.6° BRIX to be measured with a refractometer. In order to maintain the efficiency of this fluid, we recommend you to check regularly its concentration with a refractometer.

Cutting fluid 723 is recommended for cutting titanium alloys and inconels. The properties of cutting fluid 723 also make it suitable for cutting non-ferrous alloys and carbides.

Cut-off wheels Serie H EXCELLENCE

The new Excellence cut-off wheels offer faster cuttings without heating.

These wheels can be used at high speed and assure an excellent quality without causing any damages on the material structure.

The quality of their function guarantees a greater life expectancy and limit the vibrations while cutting.

Available in three versions, the cut-off wheels H1, H2 and H4 will enable you to cut any metallic materials. In order to know what wheel is adequate to your need.

Cut-off wheels PRECISION

Combine performance and versatility

Elaborated according to a very rigorous specification, these cut-off wheels offer the user a precision cutting thanks to the characteristics of its binder and the quality of its abrasives.

Usable on all cutting machines, these wheels give cut-off quality which allows reducing the duration of the downstream operations.

LAM PLAN precision cut-off wheels are available in 6 versions according to their hardness and the abrasive used in their composition. The visual colour code facilitates memory.

PRESSLAM® 1.1

MADE IN FRANCE

The PRESSLAM® 1.1 is a multi-purpose, easy-to-use, automatic hot mounting press that will allow you to achieve high production levels. All parameters are accessible via a 5.7" colour touch screen. The graphic interface guides you intuitively through the different settings, which you can then store and reuse at will. It is also possible to transfer predefined hot mounting parameters via the machine's USB port. All phases are visible on the screen during the hot mounting cycle and can be modified at any time.

Each function can be adjusted separately and 4 pressurisation modes are available, along with a function reducing the amount of water used for cooling.

PRESSLAM® 1.1

Easy-to-use, productive,
automatic hot mounting press

Technical Data	PRESSLAM® 1.1
Capacity	Ø 25,4 to Ø 50 mm
Heating system	4 x 600 W around mould
Temperature range	20 to 200 °C
Heating cycle	0 to 30 min
Cooling cycle	0 to 30 min
Pressure	0 to 1,600 daN
Double mounting	yes – all diameters
Program back-up	300 with USB connexion
Pressurisation modes	4 different modes
Chamber closing	half turned cover with a safety chamber
Mould changing	Quick, without connectors- electric or hydraulic
Pre-heating mode	Yes (cleared after 6 min without manipulation)
Water saving	yes (up to 25%)
Voltage	230 V – 50 Hz single-phase
Pneumatic feed	6 to 10 bars
Dimensions W x H x D	250 x 680 x 470 mm
Weight	72 kg (depending on mould size)
Reference	60 PL110 00

Once put in service the PRESSLAM® 1.1 runs a pre-heating cycle that is cleared after 6 minutes without user intervention.

Access to mould is wide open for a sample positioning and filling facility. Quick and effortless, the locking/unlocking is realised by a cover and a ¼ turn locking lever.

Exclusive safety device

The expulsion of the sample after the mounting cycle is only possible when the safety cover is located in its intermediary position. This device creates a safety chamber in which the sample is protected in case of an eventual sticking situation.

Closed

Safe position
for sample recovery

Open

Embedding allows limiting edge stresses during the polishing step.

This operation will also allow you:

- In manual polishing: to facilitate the holding of the sample
- In automatic polishing: to place several samples together in a sample holder under optimum tightening conditions

MOUNTING MACHINES

The PRESSLAM®1.1 is equipped with a main heating unit which contains the removable cylinder. The standard heating unit covers diameters from 25,4 to 40 mm and a specific element is available for a 50 mm diameter.

The mounting chamber can be changed without any tools, nor electric or hydraulic connections.

It only takes a few minutes to change the complete heating unit.

The PRESSLAM®1.1 is the ideal link in your mounted sample production line. It is a compact machine that is both easy to use and easy to maintain and will allow you to increase your productivity while maintaining unrivalled flexibility.

Heating unit for mould assembly Ø 25,4 mm (1"), 30 mm, 40 mm, 1 1/4" and 1 1/2", 50 mm and 2"

Independent cooling unit to use the PRESSLAM®1.1 without water supply

Spacer for double mounting

GUIDANCE

M.M. 808

For cold mounting metallographic samples under pressure

M.M. 818

Vacuum impregnation device

M.M.808

NEW

MADE IN FRANCE

M.M.808 creates a pressurized environment for polymerization to avoid bubbles in the mount without affecting the physical characteristics of the resin.

While M.M.808 can be used with all cold mounting resins, it is highly recommended to be used with transparent EPOXY RESINS 603 / 603.2 and ACRYLIC RESIN 609.

Avantage

By avoiding entrapped bubbles in transparent mounts, the visibility of the sample can be improved.

In all cold mounting resins, avoiding bubbles improve edge retention while grinding and polishing metallographic samples.

By avoiding entrapment of abrasives in bubbles, M.M.808 helps improve the polishing quality after mounting.

Additionally, using the M.M.808 unit for cold mounting eliminates the odors typical of cold mounting resins.

Technical Data	M.M.808
Pressure connection	3 to 10 bar
Nominal pressure	2 bar
Max. operating pressure	2,8 bar
Dimensions W x H x D	300 x 305 x 400 mm
Weight	8,6 kg
Inner diameter of lid opening	210 mm
Inner diameter base	225 mm
Pressure pot height to cover edge	190 mm
Reference	08 00808 20

M.M.818

NEW

Compact vacuum mounting unit for impregnation of porous materials and bubble-free mounting with epoxy resins type 603. The M.M.818 has a large capacity vacuum chamber of 160 mm diameter and is equipped with a resin distribution system. A vacuum gauge on the front panel allows the vacuum level to be monitored and the various vacuum cycles to be controlled manually.

Technical Data	M.M.818
Vacuum level	- 650 mm-Hg
Inner diameter base	160 mm
Useful height of vacuum tank	160 mm
Dimensions W x H x D	480 x 400 x 400 mm
Vacuum pump dimensions (W x H x D)	140 x 210 x 240 mm
Power supply	230 V - 50 Hz single phase
Weight	10,10 kg
Weight vacuum pump	7,25 kg
Reference	08 00818 00

HOT MOUNTING RESINS

PHENOFREE hot moulding resin

New phenol-free and formaldehyde-free thermosetting mounting resin

In line with its ecological commitment, LAM PLAN proposes on the market the first effective alternative to phenol metallographic mounting resins which are liable to release phenol (and/or formaldehyde) during baking.

The PHENOFREE mounting is intended for the technical mounting of all types of materials for material examinations or edge examinations. It smartly replaces the traditional phenol mounting resins with the same hardness and less shrinkage than a phenol mounting resins.

The range of PHENOFREE resins includes 3 coloured resins (grey, white and red) to make the identification of your metallographic samples easier. They are particularly adapted for the polishing of hard materials. The white Phenofree resin may prove to be in some cases a good alternative to the use of epoxy resins.

Characteristics	Qty. in kg	Ref.
PHENOFREE 1		
Grey composite powder Polyvalent, hard	2,5	06 PF010 20
	10	06 PF010 10
	25	06 PF010 50
PHENOFREE 2		
Red composite powder Polyvalent, very hard	2,5	06 PF020 20
	10	06 PF020 10
	25	06 PF020 50
PHENOFREE 3		
White composite powder Polyvalent, extra hard	2,5	06 PF030 20
	10	06 PF030 10
	25	06 PF030 50

Require the unmoulding agent SOLILUB.

Unmoulding agent

Recommended for PHENOFREE, 633 and 634 resins.

SOLILUB

Characteristics	Qty.	Ref.

Phenol-free
Formaldehyde-free

Hot mounting resins

To respond to all metallographic control and research situations, LAM PLAN developed and tested a range of hot mounting resins. Each resin is characterised by a very specific physical and chemical properties.

EPOXY RESINS 633 AND 634

The black epoxy mounting resin is filled with glass fibres with high mineral loads. It is ideal for mountings intended for edge examinations of hard to extra hard materials thanks to its resistance to abrasion, important hardness and absence of shrinkage. The 634 is a fine powder epoxy resin, used for examination of edged samples.

Characteristics	Qty.	Ref.
633		
Black epoxy powder, loaded with glass fibres	2,5 kg	06 00633 20
Edges examinations		
Extra hardness - No shrinkage	10 kg	06 00633 10
634		
Black epoxy powder, fine grains		
Edge examinations on complex samples	2,5 kg	06 00634 20
High hardness - No shrinkage		

ACRYLIC RESINS 616 AND 616.2

The acrylic resin 616 is perfectly transparent and adapted to most materials. Mainly used to view the evolution of the grinding of the sample.

Perfectly transparent with no cotton effect, the acrylic resin 616.2 is resistant to alcohol, and therefore ideal for work with alcohol-based polishing products or requiring a cleaning phase with ethanol, isopropyl alcohol or other.

Characteristics	Qty.	Ref.
616		
Transparent acrylic powder.	2,5 kg	06 00616 20
Visualising the sample during and after the polishing. All materials.	10 kg	06 00616 10
616.2		
Transparent acrylic powder.	2,5 kg	06 06162 20
Visualising the sample during and after the polishing. Alcohol resistant.	10 kg	06 06162 10

COPPER MOUNTING RESIN 604.3

Conductive mounting resin for examinations with SEM or electrolytic etching device. A pure copper based resin of very homogeneous consistency, the conductivity of your mountings is optimised. The use of ultra-pure materials eliminates the risk of an analysis error.

Characteristics	Qty.	Ref.
Resinoid copper powder		
For electrolytic polishing.	2 kg	06 00604 30

HOT MOUNTING RESINS

GRAPHITE MOUNTING RESIN 617

Conductive phenolic mounting resin loaded with graphite (without copper and without metals or alloys) for SEM and TEM examinations.

GUIDANCE

Characteristics	Qty.	Ref.
Conductive black phenolic powder (graphite) For SEM examination	1,5 kg	06 00617 00

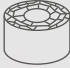

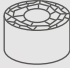

Advice on the use of LAM PLAN hot mounting resins

Material	Resin	Characteristics	Volumetric shrinkage	Color	Polymerisation time*
Composite	PHENOFREE 1 PHENOFREE 2 PHENOFREE 3	Phenol & formaldehyde Free	Low	Grey Red White	10 to 15 min
Epoxy	633	Extra hard	Very low	Black	5 to 10 min
Epoxy	634	Extra hard (fine grain)	Very low	Black	5 to 10 min
Acrylic	616	Excellent transparency	Low	Transparent	5 to 10 min
Acrylic	616.2	Transparent and alcohol resist	Low	Transparent	5 to 10 min
Copper	604.3	High conductivity	Low	Coppered	10 min
Graphite	617	Conductable	Low	Black	5 to 10 min

* Depending of the machines' characteristics

Diagnosis and guidance for hot mounting resins

Before to begin any mounting process, the grease needs to be removed from the samples in order for the resin to adhere to the contours of the parts. Check if any burrs were committed in the cutting process. If necessary, deburr the sample's edges with an abrasive paper.

Noticed faults	Cause	Solution
Primer cracks on the sample's edges	 Oversized Coated part according to the chosen mounting mould	Reduce the size of the sample or increase the size of the mounting mould
Shrinkage	 Inadequate mounting resins	Choose a resin offering less shrinkage
	 Insufficient heating time	Increase the temperature during the heating time
	 Inadequate pressure mode and insufficient pressure	- Use the machine mode adjusting the temperature curve - Increase the mounting pressure
Resins grains visible on the faces of the sample	 Insufficient pressure	Increase the pressure during the mounting cycle
	 Insufficient heating time	Increase the heating time
"Smoke" visible in a transparent mounting	 Wrong pressure choice	Choose a pressurisation only during the cooling cycle
	 Too much resin according to the size of the sample	Limit the quantity of resin inserted in the mould or reduce the size of the mould
Mounting stuck in the mould	 Insufficient heating time	Increase the heating time
	 Insufficient "solilub" powder	Drop a sufficient amount of "solilub" on the machine's superior and inferior pistons
Bulge on top of the mounting	 Insufficient heating time	Increase the heating time
	 Insufficient cooling time	Increase the cooling time

Cold mounting resins

Mainly intended for the metallography research sector, the LAM PLAN range of cold mounting resins offers many technical and economic advantages.

The cold mounting resins are the solution for samples which do not withstand high pressure or temperature. In addition, they allow responding in a simple and efficient way to timely needs by circumventing the investment of a hot mounting press. You can achieve a large quantity of samples simultaneously while adjusting precisely the volume of mounting material and shape of the moulds.

ACRYLIC RESIN 601.2

The fluidity of this transparent mounting resin and its very low shrinkage ensure a maximum penetration ratio in cavities. It is ideal for microelectronics, optics and microsystem applications. Compatible for conventional scanning electron microscopy (SEM) examinations.

Mono-component resin easy to dose and manipulate (no loss). Polymerisation with low temperature rise in 20 minutes in the blue light device M.M.866 + 10 minutes for the surface varnish. With no disturbing odour, it is resistant to alcohol and acids..

Characteristics	Qty.	Ref.
Transparent Acrylic Monocomponent	Resin 1000 ml + varnish 100 ml set	06 00601 00
Maximum exothermic temperature: 95°	Resin 1000 ml	06 01601 00
	Varnish 100 ml	06 01602 00

Without shrinkage

EPOXY RESIN 603

The Resin 603 is a two-component epoxy resin without CMR substance used to achieve high quality technical metallographic mountings at room temperature. This resin is the best choice when the transparency of the coating is a requirement. The resin has zero shrinkage, excellent adhesion to all kinds of materials and a very good chemical resistance.

With an ideally adjusted viscosity, the resin 603 is used to mount metallographic specimens with complex shapes, porosities, or delicate technical coatings.

Characteristics	Qty.	Ref.
Transparent Epoxy 2 liquid components	Liquid 1000 ml + hardener 500 ml set	06 00603 00
Maximum exothermic temperature: 105°	Liquid 1000 ml	06 01603 00
	Hardener 500 ml	06 02603 00

EPOXY RESIN 603.2

The Resin 603.2 is a fast-curing two-component epoxy resin without CMR substance used to make technical metallographic mountings. It must be used on materials that withstand temperatures of 140°C.

This transparent resin has zero shrinkage, excellent adhesion to all kinds of materials and very good chemical resistance.

Characteristics	Qty.	Ref.
Transparent Epoxy 2 liquid components	Liquid 1000 ml + hardener 500 ml set	06 00603 20
Maximum exothermic temperature: 140°	Liquid 1000 ml	06 01603 20
	Hardener 500 ml	06 02603 20

Fast hardening

COLD MOUNTING RESINS

METHYL-METHACRYLATE RESIN 605

Versatile, it is adapted to the majority of common materials for the fast mounting standard sample. It is possible to change the viscosity by modifying the proportion of the mixture: liquid + powder. Resistant to the principal acids used in laboratories.

Solvent free and CMR-free (no Carcinogenic, Mutagenic, toxic to Reproduction susceptences).

Characteristics	Qty.	Ref.
Green Methyl-methacrylate 2 components (powder and liquid)	Powder 1 kg + catalyst 500 ml set	06 00605 00
	Catalyst 500 ml	06 00615 00
Maximum exothermic temperature: 108°	Powder kit (10 kg) + catalyst (5 litres)	06 00605 10
	Catalyst (5 litres: pack. 2 x 2.5 litres)*	06 00615 10

POLYESTER RESIN 607

The Resin 607 is a three-component resin based on modified polyester.

This fast curing resin adheres perfectly to metal surfaces and its mechanical characteristics make it particularly effective on very hard materials.

Its very low shrinkage allows edge examinations on metallographic samples.

It is resistant to the main acids and bases used in laboratories.

Characteristics	Qty.	Ref.
Modified white polyester 3 components	Resin kit: catalyst 500 ml + hardener 250 ml + powder 750 g	06 00607 00
	Catalyst 500 ml	06 00607 10
Maximum exothermic temperature: 122°	Hardener 250 ml	06 00607 20
	Powder 750 g	06 00607 30

METHYL-METHACRYLATE RESIN 609

A perfectly transparent resin used for precision parts, notably those of the electrical or electronics industry. It renders the sample perfectly visible, which allows analysing precise points. It must be used with the pneumatic device M.M.808 to obtain an optimum transparency.

The methyl-methacrylate resin 609 is available in the Plastichrome version – 5 transparent colours to simplify the classification of samples.

Solvent free and CMR-free (no Carcinogenic, Mutagenic, toxic to Reproduction susceptences).

609

NEW

METHYL-METHACRYLATE RESIN 665

Cold setting resin for sample recovery.

Mounting is a step in metallographic sample preparation which enables samples to be ground and polished more ergonomically. Embedding the sample in a resin is usually irreversible and recovering the sample (if necessary) after embedding proves almost impossible.

Resin 665 is a cold mounting resin that has the unique ability to dissolve in acetone. This ability is transformed into a sustainable functionality to recover metallographic specimens after mounting. After metallographic processing of costly materials such as noble metals, it is often important from an economic and technical perspective to recover the samples from the mounting resin.

Characteristics	Qty.	Ref.
Modified green polyester 2 components (Powder + Liquid) Maximum exothermic temperature: 112°	Powder 1 kg + catalyst 500 ml set	06 00665 00
	Catalyst 500 ml	06 02665 00
	Powder 1 kg	06 01665 00

Advice on the use of LAM PLAN cold resins

Material	Resin	Characteristics	Volumetrical shrinkage	T°*	Color	Polymerisation
Acrylic	601.2	Liquid monocomponent Low heating	Very low	95°C	Transparent	Curing < 20 min in the blue lightening device +10 min for the varnish
Epoxy	603	Without shrinkage	Non-existent if used with pressure device M.M.808	105°C	Transparent	Curing 10 hours
	603.2	Fast curing excellent adhesion	Non-existent	140°C	Transparent	Curing 2 hours
Methyl methacrylate	605	Versatility	1 %	108°C	Green	Fast Curing < 10 min
Modified polyester	607	Hardness	Very Low (<0,2%)	122°C	Beige	Fast Curing < 15 min
Methyl methacrylate	609	Excellent transparency if used with pressure device M.M.808	1 %	99°C	Transparent = colourless + 5 colours (series Plastichrome)	Fast Curing < 10 min
Methyl methacrylate	665	Soluble resin	Correct	112°C	Green	Fast Curing < 15 min

* Peak exothermic temperatures during polymerisation for a 40 g sample of resin at 20°C

GUIDANCE

Procedure for cold mounting

Keep the thin samples on the slice. Mix the resin components in the indicated proportions. Mix gently to avoid creating air bubbles. Pour the resin into the mould to the desired level and allow to cure in the open air or in an M.M.808 pressure vessel to remove any bubbles or pores. To limit heating and shrinkage, fill the mould in successive layers.

Resin	Blending proportions
601.2	1 liquid + 1 varnish. Apply the varnish on top of the coating 20 minutes after polymerisation in the M.M.866 device
603	2 volums of powder for 1 volume of liquid
603.2	2 volums of powder for 1 volume of liquid
605	2 volums of powder for 2 volums of liquid 1 and 1 volume of liquid 2
607	3 volums of powder for 2 volume of liquid
609	2 volums of powder for 1 volume of liquid
665	2 volums of powder for 1 volume of liquid

GUIDANCE

ACCESSORIES

Polymerisation lamp M.M.866

The blue light polymerisation device enables you to speed up the polymerisation process of the 601.2 resin. (20 minutes)

Designation	Characteristics	Ref.
Blue light mounting device	Solar energy collector for light-curing resins. Equipped with a timer (3 positions): 5 min. 10 min. and continual.	08 00866 10

ISOFORCE

NEW

The ISOFORCE device allows flattening of embedded samples in a central pressure sample holder. Homogeneous pressure is applied to each sample via a pneumatic cylinder. The operation is carried out in complete safety thanks to the duel control system.

Designation	Characteristics	Ref.
ISOFORCE	Ø 210 mm	60 MLISI 210
	Ø 160 mm	60 MLISI 160

Moulds with removal bottom

Mainly used with the transparent mounting resins (601.2, 609, 603 & 603.2).

PREPOLISHING & POLISHING

PREPOLISHING MACHINE

RECTILAM® 2.0

When the prepolishing phase demands a high level of effectiveness and precision the RECTILAM®2.0 is the answer. This machine is particularly productive in the preparation of coated or raw samples by high speed prepolishing. Several parts can be installed on the central pressure sample holder. Large parts can also be treated individually.

The principle of high speed prepolishing on stone enables significant material removal and unrivalled flatness without rounding the edges.

The single block design and rigidity of the RECTILAM®2.0 avoids vibration which is detrimental to the surface condition. In order to ensure significant and even removal of material, a reconditioning system automatically follows each stage of polishing.

The prepolishing system and the sample holder are connected to the same mechanical arm which guarantees precision.

The RECTILAM®2.0 is supplied with an integral security hood. The assembly includes a closed-circuit lubricating filtration system integrated into the machine as well as a spray-tap for cleaning.

RECTILAM® 2.0

Automatic flat prepolishing machine

Prepolishing of large raw samples.

Prepolishing of coated samples, mounted on a central pressure sample holder.

Grinding and prepolishing are crucial steps in the preparation of a metallographic sample. It is the quality of these steps which will condition and optimise the rest of the process.

At the end of the prepolishing step, the sample's aspect must be uniform and regular without any alteration of the inherent flatness of the material.

PREPOLISHING MACHINE

The RECTILAM®2.0's unique feature is its 2 axis principle.

The Z axis deals with the motorised rise and fall of the reconditioning tool and the pressurisation of the sample carrier.

The R axis enables precise positioning of the sample holder in relation to the grinding wheel in order to make most of the available abrasion surface.

During the start cycle the starting point of the sample/grinding wheel is automatic. The stock removal is continuously managed. The real-time display shows the operator if the rectification settings entered are appropriate.

All parameters are managed and clearly shown on the 5.7" touchscreen with graphic display.

Technical data	RECTILAM®2.0
Grinding wheel diameter	Ø 356 mm
Control	By 5.7 inch touchscreen and joystick
Grinding wheel speed	1000 to 3000 tr/min.
Sample holder speed	20 to 150 tr/min.
Applied force	10 to 550 N
Sample holder size	Ø 210 mm max
Conditioning wheel specifications	Configurable pass depth and diamond feed rate
In cycle reconditioning mode	Automatic - customisable frequencies
Stock removal range	0,1 mm to 1 mm
Measurement precision	0,02 mm
Work zone lighting	Enclosed LED
Body	Powder-coated steel
Grinding wheel motor power	3,8 kW
Sample holder motor power	0,25 kW
Noise level	70 dB
Tension	400 V-50 Hz three-phase + neutral
Dimensions W x H x D	900 x 1620 x 1000 mm (H. cover open : 1850 mm)
Weight	450 kg
Reference	60 RL200 00

The 5.7 inch touch screen

SMARTLAM® 2.0

The SMARTLAM® 2.0 is a compact, single plate polishing machine that gives you a wide range of possibilities both in manual and semi-automatic polishing. Ergonomic and easy-to-use, the SMARTLAM® 2.0 is entirely controlled by a colour touch screen equipped with an intuitive interface. The internal memory can store 9 programs that can be exported via the USB port.

The power of the bidirectional rotation, variable-speed, constant-torque motor and the possibility to use plates with a diameter from 200 to 300 mm are exclusive assets that will allow you to face up to all situations encountered in metallographic research polishing.

Evolutive

Thanks to the mechanical pressure head option SPRINGLAM® and the central-pressure holders but also use of the M.M. 909 M programmable dosing unit slaved to the machine, you will have a very efficient, semi-automatic polishing system.

Options: SPRINGLAM® pressure head to use the SMARTLAM® as a semi-automatic polisher

Variable pressure thanks to the 0- 250 N spring

Attachment system for central pressure sample-holder

Sample-holder Ø 119 mm 6 alveolus water drops for Ø 20 to 32 mm

SMARTLAM® 2.0

The most versatile manual polishing machine

909 M DOSING UNIT

M.M. 909 M dosing unit technical data

Distribution system	Distribution of 3 different liquids
Controls	Touch screen
Pumps	3 peristaltic pumps, with 1 outlet to drive an external pump
Electrical power supply	230 v single-phase 50 Hz
Dosing / machine communication	1 x 24 V input for machine servoing
Option	Replacement of a standard peristaltic pump by a high flow rate pump for high-viscosity products
Reference	08 00799 10

Easy cleaning: spinning function, removable water input, easy tank removal

Technical data	SMARTLAM® 2.0
Plate Capacity	Ø 200 to 300 mm
Body	Steel, coated with epoxy paint
Bowl	Removable resin basin for easy cleaning
Controls	3,5" touch screen to control the machine: start/stop, timer, speed and direction of plate, water solenoid valve
Plate rotation speed	Variable from 20 to 650 rpm
Rotation	Clockwise / counter-clockwise
Programming	Loads 9 programs
Connection	Slave connector for dosing unit
Water inlet	Removable pipe with flow-rate adjustment and safety solenoid valve
Power max	0,75 kW
Voltage	230 V - 50 Hz single-phase
Dimensions W x H x D	450 x 300 x 650 mm
Weight	30 kg
Reference	60 SL200 00

POLISHING MACHINES

SMARTLAM® 3.0

With the SMARTLAM®3.0, LAM PLAN proposes an economic solution in terms of automatic pre-polishing and polishing of metallographic samples.

The SMARTLAM®3.0 is equipped with a new specific motorised head, composed with a 3 cells sample-holder and an individual pneumatic pressure system.

The moto reducer group has a high torque, the speed and the rotation can be set. The individual pneumatic pressure system handled by the electronic proportional valve, assures a great polishing regularity. The pressure applied per sample goes from 5 to 60 N.

The SMARTLAM®3.0 uses the reliable and proven base of the SMARTLAM®2.0 from which it conserves all the assets for a manual use (activation/deactivation of the sample holder head with the touch screen). The plate's speed and rotation can be set from 20 to 650 rpm.

For more efficiency, you can connect the M.M. 909 M automatic dosing unit to your SMARTLAM® 3.0 and benefit of a very economic and competitive set.

The automatic motorised head compactness is due to its strategically placed power supply on the side of the machine. The head rotates to free the workspace and allows the easy change of the polishing support and the cleaning of the plate and bowl.

All the functions accomplished by the machine or the head are controlled by the screen. The programs can be stored in the intern memory.

NEW : motorised head guidance to facilitate up/down manoeuvres and increase rigidity for better sample flatness.

Retrofit kit available: Réf. 60 SL220 20

Technical data	SMARTLAM®3.0
Plate Capacity	Ø 200 to 300 mm
Body	Steel coated with epoxy paint
Bowl	Removable resin basin for easy cleaning
Controls	3,5" touch screen to control the machine: start/stop, timer, speed and direction of plate, water solenoid valve
Plate rotation speed	Variable from 20 to 650 rpm
Rotation	Clockwise / counter-clockwise
Programming	Loads 9 programs
Connection	Slave connector for dosing unit
Water inlet	Removable pipe with flow-rate adjustment and safety solenoid valve
Power max	0,75 kW
Voltage	230 V - 50 Hz single-phase
Pneumatic feed	6 bars, filtered 50 µm

MASTERLAM[®] 1.0

MADE IN FRANCE

Automatic, single-plate Ø 250 to 300 mm polishing machine with bidirectional rotation and variable speed. Touch screen controls, intuitive and user friendly interface, MASTERLAM[®] machines are equipped with the best programming, parameter storage and export technologies. Control of the 4-circuit DISTRILAM[®] dosing unit directly integrated.

The MASTERLAM[®] 1.0 is equipped with a powerful central-pressure head, bidirectional rotation, variable speed and pressure. The distinctive feature of this polishing head is the oscillation function with oscillation configurable both for amplitude and frequency.

The use of the oscillating head will allow you to achieve unrivalled levels of performance and versatility: it improves the quality of flatness, increases the stock removable and the service life of polishing supports (uniform wear due to the use of the entire surface of the plate.)

La MASTERLAM[®] 1.0 with the oscillation option, is particularly efficient for polishing large-sized samples and for superfinishing of mechanical components, prototypes or micro-series.

A stock removal control system with an automatic "stop at measurement" function is also available (accurate to 0,02 mm).

The MASTERLAM[®] 1.0 is a high-performance machine intended for intensive use such as in-production inspections.

Technical data	MASTERLAM [®] 1.0
Plate Capacity	Ø 250 to 300 mm
Body	Steel coated with epoxy paint
Bowl	Removable, in resin, to ease cleaning
Controls	Touch screen (5,7")
Plate rotation speed	Variable from 20 to 650 rpm Bidirectional rotation
Head's speed	Variable from 10 to 150 rpm bidirectional rotation
Applicable load	5 to 400 N central pressure
Capacity	Sample size in central pressure 6 x Ø 40 mm
Head oscillation function	Adjustable speed and amplitude (optional)
Stock removal control function	Stock removal measuring system with automatic stop, accurate to 0.02 mm (optional)
Workspace lightening	LED
Water inlet	Removable pipe, with flow rate adjustment and safety solenoid valve
Programming	60 storable programs, USB connector to backup programs and Ethernet port for networking
Cumulative machine power	1.1 kW
Voltage	230 V - 50 Hz single phase
Pneumatic feed	6 bars
Dimensions W x H x D	550 x 670 x 670 mm
Weight	80 kg
Reference	60 ML100 00

POLISHING MACHINES

MASTERLAM® 3.0

MADE IN FRANCE

Automatic, single plate Ø 250 to 300 mm polishing machine, bidirectional rotation and variable speed.

This machine has all the functions that make the MASTERLAM® range outstand and on this model a specific new combo-head. The MASTERLAM® 3.0 is the metallographic polishing machine without concession. Polishing can be carried out with central pressure or individual pressure and can be equipped with a stock removal measuring system.

The MASTERLAM® 3.0 is based on the same technology as the MASTERLAM® 1.0 with, in this configuration, a powerful central and individual pressure head equipped with 6 pistons.

Changing sample holders is quick and the pressure mode is controlled directly on the screen without having to touch the head, thus, you can switch from one pressure mode to another in a few seconds.

POLISHING

MASTERLAM® 1.1

Automatic single-plate Ø 350 to 400 mm polishing machine, bidirectional rotation and variable speed.

The MASTERLAM® 1.1 is a central pressure machine. It is equipped with a 2,2 Kw main motor, a 250 W head motor and applicable pressure may reach 450 N.

Using the oscillating head allows you to make use the entire surface of the 350 or 400 mm diameter plate: the quality of flatness is improved, stock removal is increased and the service life of polishing supports is increased (uniform wear due to use of the entire surface of the plate.)

The specific capacities of the MASTERLAM® 1.1 allow it to cope with most difficult applications, particularly in terms of large polishing surfaces where the torque and required pressure exceed the capabilities of standard equipment.

MASTERLAM® 1.1
 Large diameter, automatic polishing machine with central pressure and motorised oscillating head

DISTRILAM dosing unit programming integrated to the machine's commands in the full range of MASTERLAM® machines.

Possibility of changing parameters while the machine is working: pressure, speed, time and dosage (except the rotation.)

POLISHING MACHINES

Dosing unit DISTRILAM®

MADE IN FRANCE

The automatic dosing unit DISTRILAM® is directly controlled via the touch screen on the machine through a RS 232 connector. It is instantly recognised by all the MASTERLAM® polishing devices as the control program is already programmed in the machines. It is equipped with 4 circuits composed of 3 standard peristaltic pumps for an accurate dosage of diamond liquids, and 1 high flow rate peristaltic pump for the dosage of the lubricant or the colloidal silica abrasive. It works without compressed air nor electric wiring.

The automatic dosing unit DISTRILAM® is an indispensable accessory for an automatic use of the MASTERLAM®.

This device is the guarantee of a reproducible process and an economic use of the fluids.

It contains: a dosing unit, a machine connection, a 4 ways distribution nozzle on magnetic leg and 4 plastic bottles.

Technical data	DISTRILAM®
Dimensions L x H x P	170 x 205 x 200 mm
Reference	60 MLD00 00

Transparent protective housing

The secured housing is a totally transparent protection compatible with the full range of MASTERLAM®.

Its opening stops all movements of the machine*, it offers an integral protection complying with the 2006/42/ CE and 2004/108/CE standards. The housing's design preserves the accessibility of the plate and does not clutter the workspace.

The touch screen is located outside of the secured zone; therefore, the commands are permanently accessible.

For the MASTERLAM®1.0 and 3.0 the touch screen control panel is located on the right, a 195 mm space needs to be foreseen in addition to the machine width.

**However, the transparent secured housing authorises the plate rotation in the manual mode.*

Universal sample-holder mould

The LAM PLAN universal sample-holder mould is a smart and economical system which combines the functions of both mounting mould and sample-holder for cold mounting processes using any kind of liquid resin. This system has been developed as two removable parts: the metallic universal sample-holder with non-stick coating and a special silicon based flexible mould to embed your cold mounting samples.

Use

The 610 sample holder can be used on both automatic and semi-automatic machines. It is directly compatible with the SMARTLAM®2.0 fitted with the SPRINGLAM® pressure arm. An adaptor kit is available for use with an automatic machine with motorised head.

Fixing accessories

The discs and plates FAS[®]2, FMS[®], X LAM[®], FIX LAM[®] and XLAM 4 allow you to easily fix all your discs whether self-adhesive or not, for simplified manipulation.

FAS[®]2 DISCS

The solution for adhesive fixing

The FAS[®]2 facilitates the sticking and unsticking of all self-adhesive supports (abrasive papers, grinding and polishing discs). It avoids the time consuming cleaning of plates dirtied by glue remains whenever a self-adhesive disc is removed.

The patented material comprising the FAS[®]2 system allows combining the softness and regularity of the abrasion of a flexible coating with the inherent flatness obtained with a metal support.

Available in 2 versions:

- FAS[®]2: rigid self-adhesive, fixed to your machine's plate, available in all diameters, its low thickness (1 mm) guarantees the initial inherent flatness of the master plate.
- FAS[®]2-M: suitable for machines equipped with magnetic base plates or when the LAM PLAN FMS disc is used. The FAS[®]2-M has 2 usable sides, it is therefore reversible, when one side is damaged the other can be used.

XLAM 4 NEW**New fixing for polishing discs Serie X.**

The XLAM 4 is an innovative product for fixing non-self adhesive polishing discs on metallographic polishing machines by contact. The XLAM 4 is a thin disc to be fixed on the machine plate. Its special surface enables the adherence of XLAM series discs without self adhesive, so polishing supports are quickly and effortlessly interchangeable. Polishing discs can easily be stored and reused.

The XLAM 4 enables easy transition between the different polishing steps and so reduces the time needed for sample preparation.

GUIDANCE

Extend the service life of your discs thanks to the discs and plates storage system.

BOX LAM® 300

The BOX LAM® 300 allows storing discs and plates, up to Ø 300mm. Delivered with 10 sliding aluminium shelves, which may be equipped, among others, with a foam template to store your samples. The large transparent cover and the shelf arrangement allow an optimum visibility of the stored products.

Characteristics	Qty.	Dim. (mm)	Ref.

Ultrasonic cleaning

The efficiency of ultrasonic cleaning

The ultrasonic process is the most used to clean parts because it guarantees a rapid and efficient result, while avoiding the deterioration of the material. 2 tank capacities are available: 0.8 and 2.75 litres.

The tank consisting of a container and a basket made of stainless steel is equipped with a timer from 0 to 30 minutes.

Abrasive papers SiC STANDARD

Available from P80 to P4000 from \varnothing 200 to 400 mm.

The LAM PLAN® abrasive papers respond to very strict quality standards. The calibration of the silicon carbide grains is guaranteed for the European standards FEPA regardless of their size (P80 to P4000).

The resistance of the resins used to maintain the abrasive grains gives to the LAM PLAN® abrasive papers a high resistance to heat and moisture. The orientation of the grains is obtained by an electrostatic process. The choice of the support paper (thickness and basis weight) is adapted to the grain's thickness in order to reduce the wear of the abrasive papers. The paper is made impermeable in its mass and on the surface.

CAMEO®DISK

Grinding and polishing are key steps in the preparation of a metallographic sample. It is the quality of these steps which will condition and optimise the rest of the process.

At the end of the grinding step, the sample's aspect must be uniform and regular without altering the inherent flatness and the material. The CAMEO®DISK's performances in terms of stock removal reduce the work time on the part, thereby guaranteeing the sample's inherent flatness, an indispensable condition to succeed with your metallographic analyse.

Stock removal

The CAMEO®DISK honeycomb cell structure allows decreasing the surface in contact with the sample to be polished. The pressure required to grind the sample is much less than that generally applied during the use of a solid disc. The equipment is less stressed and the risks of tearing out the grinding disc are significantly reduced.

CAMEO®DISK

A patented honeycomb cell structure

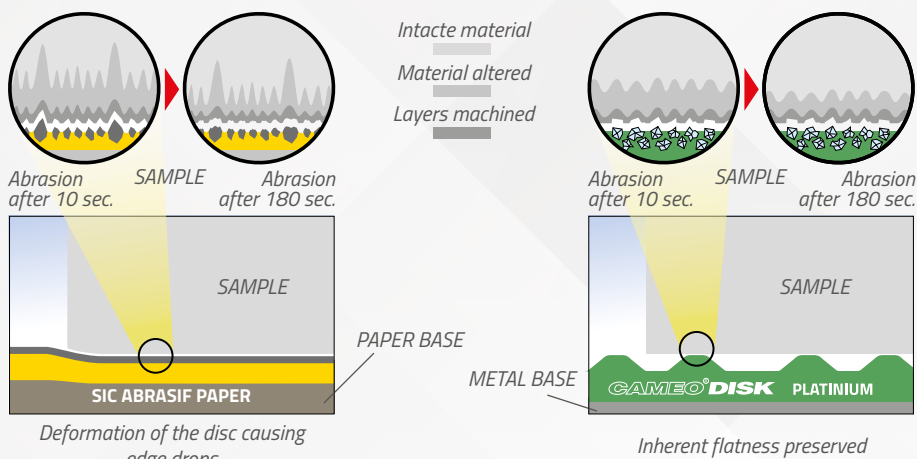

Reproducibility

The profile of the honeycomb cells was specially designed to optimise the circulation of the lubricant from one cavity to another. The abrasion residues are evacuated, guaranteeing a constant abrasive power and therefore a regularity of the result throughout the grinding and polishing steps.

Preparation quality

For a process usually performed with several SiC abrasive papers, LAM PLAN proposes you a single, reusable disc: the CAMEO®DISK. Contrary to SiC abrasive papers, CAMEO®DISK constant abrasion prevents the formation of deep disturbed layers during the first few seconds of grinding.

CAMEO®DISK Platinum

The CAMEO®DISK Platinum are diamond discs (fixed abrasive) which are ideal for a rapid grinding of metallographic samples.

The use of diamond integrated in the CAMEO®DISK Platinum honeycomb cell structure allows preserving a constant stock removal throughout the operation, which prevents the appearance of edge drops, including on samples of heterogeneous hardnesses.

GRINDING AND PREPOLISHING DISCS CAMEO®DISK

CAMEO®DISK Silver, Gold & Rhodium

The CAMEO®DISK Silver, Gold & Rhodium discs are non-diamond grinding discs developed to be used with Bio DIAMANT® abrasive products (free abrasives.)

Combined with the latest products of the Bio DIAMANT® range, the NEODIA® diamond abrasives will allow treating all types of materials.

The patented CAMEO®DISK honeycomb structure allows the uniform distribution of the periodically pulverised diamond abrasive suspension. The use of the abrasive suspension is optimised, thereby reducing the diamond product's consumption.

There are three variants of CAMEO®DISK designed with differing hardness suited for different types of material prepolished.

GUIDANCE

In order to guarantee constant results, the CAMEO®DISK have to be periodically dressed by appropriate abrasive dressing tool.

TOUHLAM®

TOUHLAM® polishing cloths & pads

LAM PLAN proposes a range of exclusive TOUCHLAM® polishing cloths and pads.

We conceive and produce all our TOUCHLAM® products, favouring quality of results through the selection of materials and treatments.

Quality of results

The structure and the composition of a polishing support have a direct impact on the properties of the associated free abrasive during a polishing process. LAM PLAN has designed a range of polishing cloths & pads according to their capacity of optimising the abrasive functions in order to obtain an optimum quality of results.

LAM PLAN guides you in your cloths and pads selection according to your results expectations

Monocrystalline diamond

Polycrystalline diamond

Polycrystalline diamond on cloth

BIO DIAMANT® abrasive suspension

For many years, the LAM PLAN R&D department has been committed to develop advanced products which are more user oriented and aimed to preserve the environment without compromising effectiveness.

Secured supply and total traceability.

Conformity to the REACH regulation.

LAM PLAN sets up all the arrangements needed for its application in order to guarantee the quality and availability of all its products over the long term. All the substances contained in our preparations comply with the REACH regulation's specifications. To facilitate your administrative formalities, all the Safety Data Sheets (SDS) of our products conform to the legislation in force it can be downloaded on www.fds.lamplan.com

BIO DIAMANT® ABRASIVE SUSPENSION NEODIA®

In direct line with our famous Bio DIAMANT® range, the NEODIA® diamond abrasive suspension goes even further in terms of performance, efficiency and user comfort. The NEODIA® diamond suspension is a top-of-the-range product featuring exceptional performances.

Enhance roughness

The quality of the abrasive used, the tight criteria of calibration and concentration, as well as the use of a new generation of water-based binders allow better roughness results while preserving a high stock removal. The binder consistency allows the cutting action to start at the first seconds of usage.

Free of VOCs

The NEODIA® diamond suspensions are composed of a specific new generation binder; this liquid is free of Volatile Organic Compound (VOCs). The NEODIA® diamond suspensions is of course biodegradable at more than 70 % in accordance with the criteria of our Bio DIAMANT® label. Non-toxic and harmless, they are neutral, the user's work conditions are thus respected.

Biodegradable packaging: reduction of your activity's environmental impact

For the first time in the polishing industry a diamond suspension is packaged in a plastic bottle of vegetal origin which is 100% biodegradable and compostable according to the standard NF EN 13 432 (for 200 and 400 ml packaging).

DIAMOND SUSPENSION

BIO DIAMANT® ABRASIVE SUSPENSION NEODIA®M

DIAMOND SUSPENSION

BIO DIAMANT® ABRASIVE SUSPENSION PULMATIC 310 AND 320P

For large surface polishing and material sensitive to corrosion.

The Pulmatics are proposed in a practical packaging for a very good distribution of the product over the work surface. They are free of any propeller gas. Pulmatic 310 is an alcohol based monocrystalline diamond liquid of a medium concentration. The Pulmatic 320P is an alcohol based polycrystalline diamond liquid of a strong concentration.

Finishing liquids SUPERFINISH

FINAL FINISHING LIQUID

Aqueous suspension of non-agglomerated nanometric silica stabilised in an alkaline medium. Used to carry out super finishing, to obtain ultra-low roughness. Very easy-to-use and applicable on all types of materials. Does not crystallize.

Usage recommendation: dilute 10 to 20% in water.

Characteristics	Type	Conditioning	Ref.
Final polishing on polishing cloth.	Final liquid	500g	05 NL008 00
All materials.	Final liquid	5 litres	05 NL008 40

L1 FINISHING LIQUID

Final polishing suspension specially formulated for mechano-chemical polishing. During usage, the active substances of the solution embrittle the surface to be polished, thereby optimising the efficiency of the abrasive grains. Allows combining performance (stock removal) and polishing quality. Recommended for titanium and its alloys.

Usage recommendation: ready-to-use preparation.

Characteristics	Type	Conditioning	Ref.
Final polishing on polishing cloth.	L1 liquid Titanium	1 litre	05 NL01 00
All materials.			

L2 FINISHING LIQUID

Composite solution of ceramic oxides and silica. Ideal to prepare your surface before the super finishing step. Recommended for the polishing of aluminium and its alloys.

Usage recommendation: ready-to-use preparation.

Characteristics	Type	Conditioning	Ref.
Final polishing on polishing cloth.	L2 liquid Aluminium	1 litre	05 NL02 00
All materials.			

ALPLAN LIQUIDS

New final polishing solutions composed of aluminium oxides of a very high purity. These alumina preparations are subjected to a pushed de-agglomeration treatment; which result excellent polishing quality. Easy-to-use, ALPLAN solutions are usable on all types of materials.

Usage recommendation: use pure or diluted up to 50% with water.

DIAMOND SUSPENSION

Bio DIAMANT® Stick Series 122 and 123P**For manual use and control of consumption**

The diamond paste is distributed according to a precise dosage thanks to a drum graduated every 0.2 g. The diamond paste is repetitively loaded on the polishing cloth without any contact with fingers. The pastes and sticks are used with 702 and 704 type lubricants. The product's colour marking facilitates its identification.

The dosing sticks series 122:

are composed of a monocrystalline diamond paste of a strong concentration.

The dosing stick series 123P:

are composed of a polycrystalline diamond paste of a strong concentration.

Bio DIAMANT® pastes Serie 100

Unique abrasive compounds

Designed for all grinding and polishing work, the Bio DIAMANT® Pastes contain a diamond powder free of any impurity, guaranteeing its cutting power. The perfectly calibrated grains are uniformly suspended in chemically pure ingredients.

A formulation which provides a more uniform and more fluid abrasive film which allows an immediate abrasion of the part to be polished.

The concentration of the pastes has a direct effect on the polishing's execution rate: a high concentration is the guarantee of a high yield.

LUBRICANTS

Lubricant M.M.702

Lubricant to be used to optimise polishing with Bio DIAMANT® diamond pastes series 100 and sticks series 122 & 123P. Ready-to-use, it ensures an excellent dispersion of the abrasive and prevents the risks of heating the material during polishing.

This lubricant is easily cleaned with water, alcohol or aqueous detergents (detergent 742).

Characteristics	Conditioning	Ref.
Recommended as an addition to LAM PLAN diamond pastes and sticks	1 litre	07 MM702 30
Water base	5 litres	07 MM702 40

Lubricant M.M.704

Alcohol-based lubricant perfectly suitable to polish samples which are sensitive to corrosion. Ready-to-use, it ensures a strong cooling during the work.

This lubricant is particularly recommended for the polishing of ductile materials.

For cleaning, it is recommended to use the detergent 742 or alcohols like isopropyl alcohol.

Characteristics	Conditioning	Ref.
Recommended as an addition to LAM PLAN diamond pastes and Pulmatic Alcohol base diamond liquid	1 litre	07 00704 30
	5 x 1 litre*	07 00704 40

Booster for CAMEO® DISK Platinum

Booster fluid is a new lubricant especially developed to be applied on the CAMEO®DISK Platinum during the polishing step. Its specific formulation facilitates the use of the CAMEO®DISK Platinum 0, 1, 2, 3 and 4.

Ready-to-use, this new lubricant maintains the efficiency of the CAMEO®DISK constant in time and avoids the use of abrasive stone to regenerate the disc.

The main advantages are:

- Improves the efficiency of the CAMEO®DISK
- Keeps the efficiency constant in time
- Reduces water consumption
- Universal use, can be used on all kind of material
- Ready to use.

Characteristics	Conditioning	Ref.
Ready to use lubricant fluid	5 litres	07 BP030 40

Metallographic reagents

Etching reagents are used to examine the structure of metallic materials. The objective of the micrographic analysis is to highlight the structure of the material (inclusions, grain boundaries, phases, ...) using an optical microscope.

These reagents act either by preferential chemical attack, or by coloration of certain constituents compared to others.

M.M.818 vacuum impregnator device

Compact vacuum mounting unit for impregnation of porous materials and bubble-free mounting with epoxy resins type 603. The M.M.818 has a large capacity vacuum chamber of 160 mm diameter and is equipped with a resin distribution system. A vacuum gauge on the front panel allows the vacuum level to be monitored and the various vacuum cycles to be controlled manually.

Technical Data	M.M.818
Vacuum level	- 650 mm-Hg
Inner diameter base	160 mm
Useful height of vacuum tank	160 mm
Dimensions W x H x D	480 x 400 x 400 mm
Vacuum pump dimensions (W x H x D)	140 x 210 x 240 mm
Power supply	230 V - 50 Hz single phase
Weight	10,10 kg
Weight vacuum pump	7,25 kg
Reference	08 00818 00

PE128 precision sample holder for thin slides

The LAM PLAN PE128 specimen holder is used to hold several thin slides by vacuum suction during a lapping operation. This sample holder guarantees a high level of parallelism.

The precision and robustness of this device allow it to meet the specific demands of research laboratories as well as the constraints of production laboratories.

- Adjustable thickness of the thin blades and automatic parallelism.
- The set includes 1 micrometer ruler, 1 vacuum pump and 1 sample holder \varnothing 120 mm.
- Compatible thin blades : 6x 30x45 ou 6x 28x48 - 1x 120x45 + 2x 28x48 (or 2x 30x45) 1x 120x90 - 1x 60x80 + 2x 28x48 (or 2x30x45) - 2x 60x80 - 4x 24x27 - 4x \varnothing 1 inch.

NEW

Technical Data	PE128
Accuracy of the adjustment ring	200 μ m per rotation
Useful internal diameter	128 mm
Dimensions (H x \varnothing)	210 x 144 mm
Weight	6,27 kg

LAM PLAN presents you its new developments resulting from the collaboration of our TEST CENTRE with reference LITHO-PREPARATORS.
An offer composed of equipment and consumables dedicated to the preparation of geological substrates and in particular the realization of thin sections.

ROUGHING AND POLISHING

M.M.8400 with PE128**Grinding and thickness adjustment**

The LAM PLAN M.M.8400 grinding machine combined with the PE128 mounting is the ideal equipment for making reference faces or for precise thicknessing. Combined with the AQUA LAM® range of Sic abrasives from roughing to grinding it is a reliable and versatile solution for preparing your mineral samples.

**MASTERLAM® 3.0 with thin slide holder****Finishing polish**

The MASTERLAM® 3.0 automatic polisher with the new thin blade holders will allow you to achieve the final polishing of your samples.

To achieve your goals we offer TOUCHLAM® polishing mounts, NEODIA® BioDIAMANT® abrasives and SUPERFINISH superfinishing liquids.

Conditioning rings: //Cast iron //Ceramic //PVC

Pressure systems: //Weight //Pneumatic //Weight compensation

Safety devices

AN OFFER COVERING ALL MARKET NEEDS

LAPPING

The lapping process consists in obtaining a flatness and/or a specific roughness for the finishing of parts for production or maintenance work.

The surface finish obtained on a cast iron plate with conventional abrasives is in the range of $0.4 \mu\text{m Ra}$ with a matt aspect.

With a composite plate and a diamond abrasive, a Ra of $0.07 \mu\text{m}$ and a shiny aspect can be achieved.

POLISHING SUPER FINISHING

The polishing and surface finishing operations need to meet technical, dimensional and aesthetic requirements. The surface finish obtained is characterized by a low roughness $0.01 \mu\text{m Ra}$, a brightness which is subjected to visual and/or microscopic control. Due to the diversity of the materials encountered, the surface finish of the raw parts and the result to be sought, the superfinishing requires extremely varied preparation techniques which make use of the full range of LAM PLAN know-how.

EQUIPMENT

Machine capacities

LAM PLAN lapping and polishing machines have been developed and perfected with LAM PLAN M'M' patented technology. They respond to all market requirements which require the obtention of high quality polished surfaces or flatnesses under one micron.

The wide range of the machine versions in this catalogue, will enable you to treat pieces from micro-mechanic up to a seal part measuring several decimetres. Linked to our consumables range, you will be assured of repeatable results on all industrial materials.

LAM PLAN lapping and polishing machines have been developed and perfected with LAM PLAN M'M' patented technology. They respond to all market requirements which require the obtention of high quality polished surfaces or flatnesses under one micron.

The wide range of the versions of machines in this catalogue, will enable you to treat pieces from micro-mechanic up to a seal part measuring several decimetres.

LAPPING & POLISHING MACHINES

M.M.8400**NEW**

The M.M.8400 and M.M.8600 machines are both lapping and polishing equipment which enable you to integrate a means of flat surface finishing into your workshop, at a reasonable price.

Their compact size and ergonomic controls facilitate their installation and use. The simple tried and tested design, equipped with medium dimension plates, enables you to cost effectively produce small runs.

Equipped with either a cast iron plate, DIALAM®, LAM PLAN M'M' or FAS®, this range of machines lets you achieve any type of surface finish defined by your specification (e.g. lapping, stock removal, grinding, polishing etc.)

Lapping machines M.M.8400 and M.M.8600 are also perfectly suited to your maintenance operations on all seal parts (e.g. safety valves or small mechanical parts lapping).

The process is controlled via a touchscreen, which ensures good ergonomic and intuitive use. This range of machines also gives you the possibility of saving programmes, assuring repeatability of lapping/polishing processes implemented in your workshops.

This range of machines is compatible with the new LAM PLAN 709, 710, and 719 distribution systems managed directly from the machine's control panel.

**M.M. 8400**

Variable production of small parts:
Ø 5 to 130 mm

M.M.8400 equipped with the dosing unit M.M.709

Options

Support cabinet height 73 cm, 1 door and 2 compartments	10 M8400 00
MESUREO Stock removal measurement	10 84003 00

Technical data	M.M.8400
Plate Ø	381 mm
Inner ring Ø	138 mm
Capacity per ring	1 part Ø130 mm or 170 parts Ø 5 mm
Number of rings	3
Electric power supply	230 V single-phase
Motor Power	0.37 kW
Control	Touch screen 3,5 inches
Plate rotation speed	From 30 to 90 rpm
Dimensions (W x D x H)	625 x 725 x 450 mm
Weight (without plate)	70 kg
Abrasive distribution system	Included - Type depending on the plate
Reference	10 08400 00

Support cabinet

Available equipment

These machines can be equipped with all LAM PLAN plates.

The various accessories offered (distribution unit, FAS® plates, polishing cloths, etc) enable adaption of the basic machine for any specific operations (micro-mechanic, watchmaking, electronic, etc).

MESUREO

Measurement of removal of material: ref. 10 84003 00

A system enabling obtention of flat surfaces at less than one micron, combined with a parallelism of quality between the lapped face and a reference.

The MESUREO is comprised of a perfectly flat pressure disc, which is able to transpose on a vertical axis, therefore producing pressure on the opposite face of the surface to be lapped.

The pressure plate is guided by a high precision ball bearing socket. Also, at the end of the polishing cycle, the parts contained by this tool will have a parallelism inferior to 5 microns.

The pressure surface is ceramic, assuring a long life, with no risk of metallic contamination.

Finally, this tool is equipped with a wireless sensor, allowing visualisation of material removal in real time on a PC placed next to the lapping machine to which this device is connected. The target dimension can be programmed. Therefore, the operator, via an intuitive colour range on the monitor, can instantly visualise whether or not the parts are within the defined thickness tolerance.

Example of applications for M.M.8400: lapping of impressions for stamping

Mixing plate

Watch parts polishing, mounted on a bracket

Lapping of impressions for stamping

M.M.8600

The M.M.8600 is a very competitive machine which is suitable for maintenance procedures or for one-off or reduced production runs.

Its Ø 600mm plate enables you to obtain any level in terms of geometry or surfacing.

The M.M.8600 is compatible with all lapping and polishing supports as well as all LAM PLAN distributions systems.

M.M. 8600

Moderate production of parts:
Ø 5 to 210 mm

Technical data	M.M.8600
Plate Ø	610 mm
Inner ring Ø	248 mm

LAPPING & POLISHING MACHINES

M.M.9480

NEW

M.M.9480 S VERSION

The M.M.9480 S is the new 9000 series small diameter flat lapping machine.

This Ø 480 mm lapping machine has all the technical solutions of the large capacity models. Therefore, it is particularly robust and stable.

The support plate rests on a trust ball bearing, providing strong stability. The gear motor is protected even in high pressure conditions.

Fully equipped in its standard version, it has an electronically controlled 3 cylinder arm.

The machine's smaller size makes it easier for the operator to manipulate all the accessories, such as changing the plate or loading and unloading the rings.

All basic functions of this lapping machine built for production are integrated in the 5.7" touchscreen in an intuitive interface based on icons. This allows you to control all distributing units of the LAM PLAN range and to save 12 programmes. A modem is integrated in the machine in order to carry out remote maintenance.

Technical data	M.M.9480 S version
Plate Ø	480 mm
Inner ring Ø	182 mm
Capacity per ring	1 part Ø 160 mm or 95 parts Ø 10 mm
Number of rings	3
Electric power supply	230 V monophasé
Motor Power	1.5 kW
Pressure application system	3 pneumatic cylinders
Pressure	10 to 600 N
Control	Touch screen 5,7 inches
Plate rotation speed	From 15 to 90 tr/min
Dimensions (W x H x D)	1160 x 860 x 1620 mm
Weight (without plate)	300 kg
Abrasive distribution system	Included - See specific table
Reference	10 94805 00

Options for M.M.9480 S

Flatness gauge for checking the flatness of the lapping plate	08 00899 00
Level sensors for diamond liquid and lubricating fluid	08 90001 00

**M.M. 9480**

Intensive production of parts :
Ø 5 to 160 mm

Particularly suitable for maintenance workshops, production of small parts and finishing process on high end watchmaking parts.

It is a compact piece of equipment of the highest quality, which responds to the highest finishing requirements as well as intensive production.

The M.M.9480 S is also compatible with the AUTOPLAN system for plate flatness reconditioning.

AUTOPLAN system: flatness reconditioning and grooving of the plate.

The AUTOPLAN system enables effective management of plate flatness and grooving. It is positioned and dismantled in a few minutes thanks to the dedicated fixation points integrated in the machine.

VERSION M.M.9380 S

Also available with a Ø 380 mm plate - M.M.9380 S

10 93805 00

M.M.9700

NEW

In order to respond to the most demanding specifications in terms of surface flatness and process repeatability, LAM PLAN has developed a new series of M.M.9000 machines, of which the M.M.9700 is the mid-range machine.

Fitted with a \varnothing 700 mm lapping plate, this machine has a new, highly intuitive touchscreen, enabling the user to quickly grasp the operation of the machine.

From a mechanical viewpoint, a large dimension thrust ball bearing is inserted under the machine's basic plate. This mechanism guarantees plate stability, even under a heavy load. This new concept also enables reduced demand on the gear motor group, assuring greater longevity of the equipment. Machine safety has also been improved with anti-pinch devices connected to the retaining arm castors of the conditioning rings.

Finally, the machine's new electrical design, allows easy development of machine functions and in response to your future needs, with, for example, later integration of the AUTOPLAN system, or different types of LAM PLAN distribution systems.

Therefore, this machine is intended for use in all high production workshops.

M.M. 9700

Intensive production for parts:
 \varnothing 5 to 210 mm

AUTOPLAN system: flatness reconditioning and grooving of the plate.

AUTOPLAN system enables to manage efficiently the flatness and the grooving of the plate. It is installable and removable in a few minutes thanks to fixation points integrated to the machine.

Technical data	M.M.9700 E version
Plate \varnothing	700 mm
Inner ring \varnothing	274 mm
Capacity per ring	1 part \varnothing 210 mm or 160 parts \varnothing 10 mm
Number of rings	3
Electric power supply	400 V - 50 Hz - 3 phases + earth + neutral
Motor Power	2.2 kW
Pressure application system	3 weights of 13 kg included
Control	Touch screen 5,7 inches
Plate rotation speed	From 30 to 90 rpm
Dimensions (W x H x D)	1500 x 1300 x 1450 mm
Weight (without plate)	800 kg

Refrigeration and heating unit P803, for lapping plate	10 80003 90
Flatness gauge for checking the flatness of the lapping plate	08 00894 00

EQUIPMENT

All M.M.9000 series machines are fitted with an integrated modem as standard in order to carry out remote maintenance operations.

They are compatible with dedicated LAM PLAN distribution systems and can be optionally fitted with an abrasive and lubricant level sensor.

Production data collection in the form of CSV files is possible via the USB interface.

M.M.9700 S HP VERSION (HIGH POWER)**NEW**

A machine specially developed to answer polishing needs in production of parts requiring high pressure, associated with high speed plate rotation and use of specific abrasives.

The pressure system and motorisation have been adapted to the specific requirements of heavy loads and high torque.

The use of stainless steel in the machine's production, is generalised to resist certain relatively aggressive abrasive types. The machine is equipped with protective casing around the work zone, to avoid high speed projection of abrasives. It is removable and motorised.

The M.M.9700 S HP can be fitted with distribution systems suited to the required abrasives, for example high flow peristaltic pumps.

What changes	M.M.9700 S HP version (high power)
Motor Power	7,5 kW
Pressure application system	3 double effect cylinders
Pressure	100 to 2500 N
Plate rotation speed	From 15 to 125 tr/mn
Dimensions (W x H x D)	1540 x 1200 x 1800 mm
Weight (without plate)	980 kg
Reference	10 9700SP 00

Options M.M.9700 S HP version

Refrigeration and heating unit P803, for lapping plate	10 80003 90
Flatness gauge for checking the flatness of the lapping plate	08 00894 00

M.M.9100

NEW

Lapping techniques with heavy loads and intensive use require a suitably durable material. This is offered by the LAM PLAN mid and large diameter range of machines.

The rigidity of their structures and the gear motor group torque are especially suited to the high abrasion of LAM PLAN lapping plates.

The number of peripheral devices available make the machines particularly versatile and effective. Specific equipment can be made available according to requirements.

M.M. 9100

Intensive production for parts:
Ø 10 à 350 mm

AUTOPLAN system: flatness reconditioning and grooving of the plate.

AUTOPLAN system enables to manage efficiently the flatness and the grooving of the plate. It is installable and removable in a few minutes thanks to fixation points integrated to the machine.

M.M.9100 S VERSION

NEW

Version with pneumatic pressure comprising three double effect cylinders mounted on a fixed arm.

Technical data	M.M.9100 E version
Plate Ø	1 000 mm
Inner ring Ø	406 mm
Capacity per ring	1 part Ø 350 mm or 225 pièces Ø 10 mm
Number of rings	3
Electric power supply	400 V - 50 Hz - 3 phases + earth + neutral
Motor Power	5,5 kW
Pressure application system	3 weights of 28 kg included
Control	Touch screen 5,7 inches
Plate rotation speed	From 15 to 50 tr/min
Dimensions (W x H x D)	1900 x 1800 x 1500 mm
Weight (without plate)	1 000 kg
Abrasive distribution system	Included - see specific table
Reference	109100E 00

What changes	M.M.9100 S version
Pressure application system	3 double effect cylinders
Pressure	10 to 2500 N
Dimensions (W x H x D)	1900 x 1800 x 2300 mm
Weight (without plate)	1 400 kg
Reference	109100S 00

Options for M.M.9100 S

Level sensors for diamond liquid and lubricating fluid	08 90001 00
Refrigeration and heating unit P803, for lapping plate	10 80003 90
Flatness gauge for checking the flatness of the lapping plate	08 00893 00

LAPPING & POLISHING MACHINES

M.M.9100 SR VERSION**NEW**

The S, S HP and EC type lapping machines are equipped with pneumatic pressure systems of different powers. The cylinders are installed on fixed or mobile arms. On the SR version the arm turns around its 180° axis thanks to a motorised crown and is controlled by the man/machine interface. This facilitates access to the work zone, plate changing and allows passage of a robotised loading/unloading arm.

**What changes** **M.M.9100 SR version**

Pressure application system	3 pneumatic cylinders, rotating arm motorized
Dimensions (W x H x D)	1900 x 1900 x 2300 mm
Weight (without plate)	1 500 kg
Reference	10 9100SR 00

Options for M.M.9100 SR and EC

Level sensors for diamond liquid and lubricating fluid	08 90001 00
Refrigeration and heating unit P803, for lapping plate	10 80003 90
Flatness gauge for checking the flatness of the lapping plate	08 00893 00

M.M.9120 et M.M.9150

Based on the M.M.9000 series technology, we offer versions of our machines with plates between Ø 1200 mm and 1500 mm for maintenance operations on large parts or for production applications. A technical study and specifications will be provided on demand.

Available versions:

M.M.9120 E	Ø 1200 mm, without pressure system
M.M.9120 S	Ø 1200 mm, 3 pneumatic pressure cylinders
M.M.9120 SR	Ø 1200 mm, 3 pneumatic pressure cylinders on a motorized rotating arm
M.M.9120 S4R	Ø 1200 mm, 4 rings et 4 pneumatic pressure cylinders on a motorized rotating arm
M.M.9150 E	Ø 1500 mm, without pressure system
M.M.9150 S	Ø 1500 mm, 3 pneumatic pressure cylinders

M.M.9100 EC VERSION**NEW**

If the part which has to be worked is too heavy regarding the pressure prescription required for a lapping operation, lapping machine EC will have to be used. This machine's version is equipped with a pneumatic bracket which will unballast the lapping plate of the workpart weight, and provide an optimal pressure for the lapping process.

**What changes** **M.M.9100 EC version**

Load compensation system	1 pneumatic cylinder, rotating arm motorized
Compensation applicable	10 to 2500 N
Dimensions (W x H x D)	1900 x 1900 x 2300 mm
Weight (without plate)	1450 kg
Reference	10 9100EC 00

EQUIPMENT

All M.M.9000 series machines are fitted with an integrated modem as standard in order to carry out remote maintenance operations.

They are compatible with dedicated LAM PLAN distribution systems and can be optionally fitted with an abrasive and lubricant level sensor.

Production data collection in the form of CSV files is possible via the USB interface.

Referent in the domain of production lapping/polishing and material finishing, LAM PLAN has also been manufacturing and selling consumables dedicated to double-side polishing applications with the range of ECOA® liquids and TOUCHLAM® supports. In continuity of our approach in proposing complete process: products/machines/methods to our customers, we have developed a double-side range of machines to make you benefit from LAM PLAN's experience obtained over the past 60 years.

MASTERLAM®

Small series & double-side prototyping
for parts: Ø 5 to 20 mm

A security housing is proposed in option. This entirely transparent cover assures a protection of the moving parts without distorting the surveillance of the operator during the cycle. Once open, the work space becomes perfectly accessible.

The MASTERLAM® Evolution can be equipped with the MASTERLAM® series secured transparent housing.

Lifting and lowering of the superior plate with pneumatic cylinder

MASTERLAM® Evolution

In order to answer to double-side polishing issues in small series or development phase, LAM PLAN proposes the MASTERLAM® Evolution, an original and innovating approach for double-side polishing.

The MASTERLAM® Evolution is a compact and economical solution for double-side polishing, to realise high quality polishing on any kind of small parts. This equipment is particularly well-adjusted for the finishing of watch components in small series, pre-series or prototyping.

Description

The MASTERLAM® Evolution is based on a simple kinematic proposing 2 movements: clock-wise or anti-clockwise rotation of the superior plate and the main cogwheel with speed programming. These 2 movements will allow you to respond to most of your needs in terms of polishing of small series of all types of materials.

Touch screen control panel

The 5.7 inches' touch screen in this machine will enable you to manage all the settings: cycle time, rotational speed, rotation movement, pressure during cycle and abrasives distribution sequences. This intuitive screen is also offering you the possibility to save more than 300 operating ranges. A water rinse phase is also possible at the end of the cycle.

A well-equipped and safe machine

The MASTERLAM® Evolution outer ring gear is made of 316 L stainless steel, assuring a durability of the moving parts. The machine is also equipped with two FAS® plates facilitating the setting up of the polishing cloths.

Technical data	MASTERLAM® Evolution
Plate Capacity	7 carriers track Ø 250 mm ext. Ø 130 mm int.
Useful capacity	7 satellites Ø 65 mm
Superior plate rotational speed	20 to 150 rpm; Bidirectional rotation
Cogwheel rotational speed	20 to 150 rpm; Bidirectional rotation
Cogwheel motor power	0.75 kW
Superior plate motor power	0.2 kW
Pressure	5 to 400 N
Required energies	230 V-50 Hz single-phase Compressed air 6 bars filtered 10 µm
Dimensions (WxHxD)	550 x 670 x 670 mm
Total power	2.5 kW
Noise level	< 80 db at 1 metre away
Weight	95 kg
Reference	60ML1EVO00

LAPPING & POLISHING MACHINES

M.M.2380

Developed on well-known and proven technological bases, this equipment will perfectly respond to your needs in terms of double-side lapping and polishing of parts with a diameter between 5 and 30 mm.

Capable of integrating LAM PLAN lapping plates, this machine will be the solution when obtaining a geometry and ratings dimensions are key factors. In parallel, the possibility of associating the M.M.2380 to polishing supports will enable you to answer your needs when the quality of the polished surface is the decisive criteria.

Description

The M.M.2380 is built on a welded and bolted steel frame to guarantee stable and repeatable results. The plates (inferior and superior) and the central cog drive is assured by "brushless" motors, allowing to regulate the speed and to choose the rotational direction. The plates have a 380 mm exterior diameter and allow the use of 5 carriers with a usefull capacity of \varnothing 125 mm.

Touch screen control panel

All the machine settings are controlled through a large 10.5 inches touch screen. The design of the Man-machine interface assures an efficient equipment handling. This screen will show the pressure applied on the parts and the motor torque in real time. The M.M.2380 can also be endowed with a "stock removal measurement" system. Apart from the cycle time, the machine automatically stops its cycle when the target thickness of the parts is reached.

User-friendly device

The M.M.2380 can be equipped with a system enabling a rapid setting of the carriers. A "rack" system enables to store many satellites filled by the operator in masked time. The ring gear has a removable part to facilitate loading and unloading the carriers. The operator can proceed to a transfer of carriers by sliding them on a thin magnetic slab.

This device can be fitted with a ring gear or a pin ring permitting the use of carriers you would already have for similar applications.

Finally, a series of associated accessories has been developed by LAM PLAN for this machine. The FIXPAD® system associated with the FAS® will facilitate the shift of polishing pads. Moreover, LAM PLAN proposes its range of TOUCHLAM® discs, specially adapted to the superior and inferior plates of the machine.

M.M. 2380

Double-side production for parts:
 \varnothing 5 to 30 mm

Technical data	M.M.2380
Plate Capacity	5 carriers track \varnothing 380 mm ext. / \varnothing 153 mm int.
Useful capacity	5 carriers \varnothing 125 mm
Superior plate rotational speed	0 to 160 rpm; Bidirectional rotation
Gearwheel rotational speed	0 to 80 rpm; Bidirectional rotation

Automatic distribution system

The automatic distribution system ensures precise and regular distribution of products. It's the solution for abrasive film control and lubrication. The yield of removed material and temperature control depend directly on the quality and constancy of the abrasive film.

The various adjustments, distribution intervals, spraying times, head positioning, enable homogeneous and reproducible polishing results, as well as economising on consumables.

The 719 and MM 809B distribution systems are venturi type systems which allow product to be sprayed when the 709, 710 and MM909 systems are equipped with peristaltic pumps which deliver products drop by drop or flowing.

The venturi system is reserved for low viscosity and high decanting products, for instance, certain oil-based products. The peristaltic system is more versatile and has the advantage of not generating mist.

The high volume 8000 series distribution systems are those based on vortex pump systems for the 8003 and 8007 models and peristaltic high flow for the 8017 model, suitable for high volume products generally used in production applications. They are primarily reserved for SiC abrasives which have a high tendency to settle.

Dosing unit dedicated to LAM PLAN machines

DOSING UNIT TYPE 709

NEW

Peristaltic model for WATER-BASED abrasives.

Reference	08 01709 00
Capacity	2 x 500 cc including 1 with agitator
Electric power supply	220V single phase + 24 V input for control
Pump flow rate	0,5 ml/sec.
Distribution system	Nozzles not included, see machine recommendation.

DOSING UNIT TYPE 710

NEW

Peristaltic model for OIL-BASED abrasives.

Reference	08 01710 00
Capacity	2 x 500 cc including 1 with agitator
Electric power supply	220V single phase + 24 V input for control
Pump flow rate	0,5 ml/sec.
Distribution system	Nozzles not included, see machine recommendation.

DOSING UNIT TYPE 719

NEW

Venturi model for OIL-BASED abrasives with settling tendency.

Reference	08 01719 00
Capacity	2 x 500 cc including 1 with agitator
Electric power supply	220V single phase + 24 V input for control
Pump flow rate	N.C.
Distribution system	Nozzles not included, see machine recommendation.

OPTIONAL LEVEL SENSORS

Set of 2 level sensors for diamond liquid and lubricant.

Reference	08 90001 00

ACCESSORIES

Autonomous dosing unit

The 909 and 809 independent distribution systems enable you to easily equip any type of machine with an efficient distribution system. It's the ideal solution to retrofit or improve your equipment.

DOSING UNIT M.M.909 - PERISTALTIC

Distribution system	3 standard peristaltic pumps With an outlet to drive an external pump
Control	Touch screen
Electrical power supply	220 V single-phase - 50 Hz
Dosing machine communication	1 x 24 V input for machine servoing

Designation	Qty.	Ref.
DOSING UNIT M.M.909 ADAPTABLE VERSION With a manual start/stop button	1 with 3 glass bottles 500 cc	08 03799 00
Stirrer	1 for glass bottle 500 cc	08 02816 00

DOSING UNIT M.M.909 HV - PERISTALTIC

Distribution system	2 standard peristaltic pumps, 1 large flow pump for high viscosity liquids and an outlet to drive an external pump
Control	Touch screen
Electrical power supply	220 V single-phase - 50 Hz
Dosing machine communication	1 x 24 V input for machine servoing

Designation	Qty.	Ref.
DOSING UNIT M.M.909 HV	1 with 3 glass bottles 500 cc	08 00799200
Stirrer	1 for glass bottle 500 cc	08 02816 00

Touch screen interface

DOSING UNIT M.M.809B - VENTURI

Distribution system	- Distribution of 2 different liquids by Venturi system - 1 liquid compartment with an agitator
Control	By analog buttons and timers
Compressed air feed system	2 bars
Electrical power supply	220 V single-phase - 50 Hz
Dosing machine communication	1 x 220 V input for machine servoing

Designation	Qty.	Ref.
Dosing unit M.M.809B	1 with 2 glass bottles 500 cc	08 01809 10

M.M.809B dosing unit

Adaptable automated dosing

With the DOSER 910 and 910.2 you can equip all types of machines with a programmable and autonomous dosing system compatible with oil-based products and all types of lubricating fluids.

DOSING UNIT TYPE 910

NEW

Capacity	2 x 500 cc, 1 with agitator 2 peristaltic pumps
Electric power supply	220V single-phase
Distribution system	Nozzles not included

Designation	Qty.	Ref.
For machines from Ø 380 to 700 mm	1	08 00799 30

DOSING UNIT TYPE 910.2

NEW

Capacity	4 x 500 cc bottles with 2 stirrers 4 peristaltic pumps
Electric power supply	220V single-phase
Distribution system	Nozzles not included

Designation	Qty.	Ref.
For machines from Ø 380 to 700 mm	1	08 00799 40

Mixing and distribution systems

These distribution systems are suitable for any type of abrasive immersed in liquid whatever its composition. They enable the resolution of settling problems and guarantee regular and repetitive results.

Contact us if you would like to connect our mixing distributor to your lapping machine.

DOSING PUMP TYPE 8017

Controlled by the machine interface or by integrated sequencer for the autonomous version.

Pump type	1 peristaltic pump + mixing system
Bowl	Useful volume 7 litres
Electrical power supply	220V single-phase
Pump flow rate	3,5 ml/second
Dimensions	H 430 mm X Ø ground 250 mm
Distribution system	Nozzle 813 on mobile stand sold separately

Designation	Qty.	Capacity	Ref.
Dosing pump type 8017 for LAM PLAN machine	1	7 litres	08 08017 00
Independent dosing pump type 8017	1	7 litres	08 18017 00

ACCESSORIES

DOSING PUMP TYPE 8003

Controlled by the machine interface or by integrated sequencer for the autonomous version.

Pump type	1 vortex pump + mixing system
Bowl	Useful volume of 50 litres, on casters, drain valve
Electrical power supply	220V single-phase
Pump flow rate	50 litres/minute
Dimensions	H 870 mm X Ø ground 600 mm
Distribution system	3 swivelling outputs. Solenoid valve 3 tracks

Designation	Qty.	Capacity	Ref.
Dosing pump type 8003 for LAM PLAN machine	1	50 litres	W000 08003
Independent dosing pump type 8003	1	50 litres	W001 08003
Optional low abrasive warning system for 9000 series machines	1	-	08 90002 00

DOSING PUMP TYPE 8007

Controlled by the machine interface or by integrated sequencer for the autonomous version.

Pump type	1 vortex pump
Bowl	Useful volume 7 litres
Electrical power supply	220V single-phase
Pump flow rate	25 litres/minute
Dimensions	H 420 mm X Ø ground 250 mm
Distribution system	3 swivelling outputs. Solenoid valve 3 tracks

Designation	Qty.	Capacity	Ref.
Dosing pump type 8007 for LAM PLAN machine	1	7 litres	W000 08007
Independent dosing pump type 8007	1	7 litres	W001 08007

SPYLAP®

Ceramic conditioning rings with SPYLAP®

Prevent mechanical distortion problems. The ceramic rings enable you to preserve the flatness of the plate, to manage its heating, as well as limiting contamination thanks to the absence of graphite. The SPYLAP® sensor enables the user to visually prevent a significant mechanical distortion of the lapping (or polishing) support and of the part to be lapped. The SPYLAP® permanently monitors the temperature of the support and changes from black to red at a precisely predefined temperature.

CARRIERS FOR DOUBLE-SIDE MACHINES

The carriers are used to maintain the parts on the double-side machine. Their conception is realised according to the geometry of your parts or according to your drawings. Our carriers are available in a wide range of thickness, from a few millimetres to 200 µm.

Depending on your application and the nature of your parts, we propose our carriers in a large range of materials, such as stainless steel, blue steel (hardened until 600 Hv), glass fibre, aramid, PVC, epoxy,... For any double-side machine brand.

Designation
Epoxy carrier
PVC carrier
Metallic carrier

Avantages

- Excellent flatness and parallelism
- Quality of cuts
- Very low thickness dispersal
- Cuts atypical forms.

Exemples of application domain

- Optical
- Watchmaking
- Mechanic industry
- LED and semi-conductors.

Fixpad® system

FIXPAD® is a tool that allows simple and fast positioning of polishing discs on the plates of double-side machines.

Developed by LAM PLAN, FIXPAD® allows you to stick the discs to the plate without trapping air bubbles and without folds. Due to its design and thanks to the pre-cut TOUCHLAM® discs, the installation of discs on the upper plates is carried out in just seconds. The FIXPAD® pins guide the positioning of the pad when inserted in the distribution holes of the upper plate. This tool will simplify the installation of polishing pads and will limit machine stoppage time.

ACCESSORIES

Micrometric gauges

For a fast and precise check of your lapping plates, with a direct reading of the measurements. Precision: 1 µm. Each set includes:

- 1 marble, accuracy : 0,8 µm.
- 1 gauge made of stabilised aluminium or stainless steel for machines Ø 200 to 600 mm.
- 1 micron comparator.
- 1 transport and storage case.
- 1 user guide with charts and mapping formulas.

Designation	Qty.	Ref.

Plate maintenance and integrated reconditioning and grooving system

DIABLOC SYSTEM

The reconditioning of composite plates can be carried out in different ways.

The DIABLOC is a self-adhesive disc which has a series of diamond pellets. It is stuck onto a stable and lapped aluminium support. It allows the reconditioning of NEW LAM®M'M', EVOLAM ULTIMATE and 2000 series plates. It corrects distortion and surface faults (glazing, scratching) of your plates. The new VIOLET and BLACK DIABLOCS are more aggressive, enabling you to accelerate the reconditioning phase notably on large diameter plates.

AUTOPLAN system

The AUTOPLAN system enables efficient plate flatness and grooving in order to create structures which modify its properties. The principle lies in plate machining with a moving cutting tool. The AUTOPLAN is positioned and mounted in a few minutes thanks to the dedicated fixation points integrated in our machines.

Dedicated to series 9000 machines

At present, the automatic AUTOPLAN system can be integrated in LAM PLAN machines up to model M.M.9100. It is installed on dedicated points on the machine structure. Driven directly by the control interface, you can manage forward speed in order to carry out flattening or grooving operations. The AUTOPLAN produces spiral grooving. This system is faster and more precise than the DIABLOC. It is also easier to manage and to reproduce the required support geometry (flat, concave or convex).

Production stoppage for plate reconditioning is reduced and productivity is increased.

DETERGENT 742

Concentrated detergent in aqueous phase used to degrease and clean parts after lapping or polishing cycles. This detergent with a high anticorrosion power is an excellent alternative to conventional cleaning solvents. Non inflammable, it is ideal for cleaning all types of materials (steels, cast irons, aluminium, etc.). Dilute 2 to 5% with water for use in ultrasonic cleaning tanks (40 to 55 °C) or 7 to 20% with water for fountain based cleanings.

Designation	Qty.	Ref.
Detergent 742	5 litres	08 01742 10
	30 litres	08 01742 30

DETERGENT 743

Aqueous detergent specifically adapted for the cleaning of ceramics, refractory materials and glasses. Dilute 1 volume of detergent in 9 volumes of water.

Designation	Qty.	Ref.
Detergent 743	5 litres	08 01743 10

SUPPORTS

Cast iron plates

As a manufacturer and designer of cast iron plates and rings, we select specific high quality cast iron for optimum and long lasting results. AQUA LAM® plates and rings are suitable for all lapping machines of any brand or size. Available from stock or made to order within the shortest deadlines, AQUA LAM® cast iron plates and rings offer exceptional value for money.

Radial grooved cast iron plate with LAM PLAN adaptation system, other machine adaptations on request.

Lapping cast iron plates with radial grooving by default, available on request in full or with all types of grooves, Concentric, Helical and Linear.

LAM PLAN, designer and manufacturer of a full range of lapping and polishing supports to cover all your requirements in terms of material removal, surface finish and flatness.

LAPPING SUPPORTS

NEW LAM® M'M' plates

25 years ago, LAM PLAN designed the patented NEW LAM® M'M' poli-lapping system. Since then LAM PLAN has constantly made its process evolve to respond to the technical requirements of its customers. The system patented and established in production plants throughout the world is today a must in the lapping polishing process.

The NEW LAM® M'M' plate, uses free diamond abrasives for its operation. As soon as the plate starts rotating, under the effect of the initial weight of the parts and the load applied by the machine's jacks, the diamond grains move and fix on the surface of the plate producing a unique abrasive action on the side of the parts to be lapped.

The patent

The disposition and the shape of the two components of the plate permit an optimum alternation between the hard areas and the soft areas. The cut angle of the diamond grains is permanently changed, which ensures a large stock removal and a perfect inherent flatness.

1
The free diamond contained in the abrasive film is momentarily fixed in the plate's hard material; when they are solid with each other, they produce a cut off effect which favours the stock removal.

2
In contact with the plate's soft material, the free diamond is driven in, while remaining mobile, and removes the material by impact; it is the stock effect which contributes to the quality of the surface condition.

EVOLAM® composite plates

A plate for 3 steps

The new EVOLAM® ULTIMATE and EVOLAM® lapping plates have been specially developed for hard materials such as sapphire and technical ceramics. The specific composition of these plates gives them an excellent stock removal combined with a low roughness. A poly-lapping operation with our EVOLAM® plates allows to obtain the superfinishing stage in only one step.

A C or H groove is generally made on EVOLAM® plates to increase their performance.

GUIDANCE

Positioning of LAM PLAN composite lapping plates

Different kinds of grooves

Radial (R)

Concentric (C)

Spiral (S)

Linear (L)

Series 2000 mono-component plates

Primarily used during pre-polishing phases these plates allow a surface condition which facilitates the finishing step on polishing cloths to be obtained.

Available in solid version or to order with radial, concentric, spiral or linear grooving.

2006 - MIDDLE & FINE LAPPING POLISHING - ALL MATERIALS

Manual lapping & polishing plates

Extend the usage of your sealing parts.

LAMBLOCK are simple, inexpensive and easy to use tools that will allow preventive maintenance of sealing parts on industrial sites at a lower cost. Your maintenance department carries out manual lapping/polishing operations to recondition worn sealing parts.

BI-LAMBLOCK

2 Operations: Lapping and Polishing for the servicing of sealing part up to Ø 40 mm.

Designation	Ø in mm	Ref.
- 1 ergonomic double plate - Grey lapping / Copper polishing - 2 diadosers Bio DIAMANT® 400 series of 30 g	300	09 04LB9 00

LAMBLOCK NEW LAM®M'M' PLATE

Lapping with the guarantee of a perfect flatness for parts with a Ø 40 mm max and rings with a Ø 70 mm max.

Designation	Ø in mm	Ref.
- 1 NEW LAM M'M' plate - 1 Dosing-stick Bio DIAMANT® 10 g - 1 fluid bottle lubricant M.M.712	LAMBLOCK Blue - Lapping 300	09 04LB0 00
	LAMBLOCK Green - finishing 300	09 04LB1 00
	LAMBLOCK Yellow - Super finishing 300	09 04LB2 00

LAMBLOCK FAS®

NEW

Portable plate with non-stick LAM PLAN FAS® coating for use with the range of self-adhesive TOUCHLAM® discs. Combined with LAM PLAN abrasives, it is an economical solution for finishing and super-finishing steps on all materials.

Designation	Ø in mm	Ref.
- 1 plate with FAS® coating - 2 diadosers Bio DIAMANT® 400 series 30 g 3 and 6µ	300	09 04LB3 00

TRI-BLOCS NEW LAM®M'M' CASE

3 operations: lapping, polishing and superfinishing, for the servicing of your sealing rings up to Ø 40 mm.

Designation	Ø in mm	Ref.
- 3 NEW LAM® M'M' plates - 3 dosing sticks Bio DIAMANT® 10 g - 1 bottle of fluid lubricant M.M.712 - 1 Diabloc for reconditioning	140	09 03NL0 00

Blue Diabloc refill		08 01900 10

Temperature control system

Flat lapping is based on the laws of mechanics and physics where a constant temperature is essential.

Temperature variations of a lapping plate, whether inherent in the lapping process or dependent on external conditions, can be detrimental to the quality of the desired result. To avoid such damage, the use of our plates at high yield NEW LAM M'M' requires the use of a temperature control system.

COMPOSITE LAM PLAN plates with an integrated cooling system ensure temperature fluctuation control during series production. This option enables avoidance of plate distortion and consequently, distortion of your pieces.

To control the flatness of the trays, the temperature must be controlled

P803 Regulator

To control plate flatness, temperature must be regulated. The LAM PLAN P803 temperature regulation unit is reversible. It can also raise the plate temperature before use. This enables lapping to start in optimum geometric conditions in any work environment.

The P803 regulator is designed to maintain the temperature between 2 set values. It is an autonomous machine which has its own command interface.

NEW LAM M'M' plate with temperature control system

The LAM PLAN cooling system captures calories directly under the active plate surface. It is adaptable for all machines.

Lapping rods M.M.®

Immediately shape your rods in all form, from patented M.M.® preliminary shape containing no abrasive.

Applications

For internal and external lapping, and super finishing of spherical, conical and cylindrical parts and many other shapes.

The solution

LAM PLAN offers an original, functional and adapted solution; it responds to the requirements of surface conditions difficult to attain with tools or grinding wheels. LAM PLAN delivers its rods in preliminary shape condition. The user finalises the form of his choice. A fast machining using common tools (never a grinding wheel) allows adapting the rods to the shape of the parts to be lapped. This technique is possible thanks to the LAM PLAN M.M.® system which combines rods and free diamond abrasives.

The technique

The LAM PLAN M.M.® rods consists of two different materials in terms of mechanical, physical and resistance characteristics. The composition and arrangement of the two components associated with the usage of specific diamond abrasive is the base of the patented LAM PLAN M.M.® system and its effectiveness.

The advantages of the LAM PLAN M.M.® system associated with Bio DIAMANT®

The LAM PLAN M.M.® system uses special abrasives. A chemical binder allows homogeneous, stable distribution of calibrated diamond grains, while preventing any settling phenomenon. As soon as the rod starts rotating under the effect of the applied pressure and the passage on the two different materials, the diamond grains move and fix alternatively. This causes a phenomenon of significant acceleration of these particles ensuring a high stock removal. Penetrating very low and for a very short time in the rod's metal mass, each diamond particle always presents an edge opposite to the part to be machined.

All the cutting edges work under an over speed. The abrasive's efficiency is therefore better and more sustainable.

In addition, thanks to the use of diamond, the rod coating does practically not wear out (good behaviour in terms of shape or inherent flatness).

The LAM PLAN type M.M.® lubricant vaporised in a very small quantity allows cleaning the diamond's cutting edges loaded with metal waste and operates cooling action.

The small quantity of lubricant significantly reduces the "machining sludge" volume. The work is cleaner and produces less waste.

Qualities

In order to obtain surface conditions varying from 0.2 to 0.01 micron/Ra, LAM PLAN proposes various types of rods. The distribution of the 2 materials which make up the patented bi-component rods type M.M.® remains constant, regardless of the shape given to them. The rods type 2000 are mono-components. They benefit from the quality of bi-component materials, but their efficiency is lower and their wear more rapid.

Shapes	Preliminary shapes	A cylindrical
		B flat
		C rectangular
Types	Patented M.M. Rods Bi-components	M.M.® 980 lapping

		M.M.® 992 superfinishing
	Economic range Mono-component	2002 lapping
		2003 polishing

RODS M.M.® SHAPE A

Cylindrical preliminary shape intended to be machined by turning with a dry carbide tool in order to adapt to the parts to be treated.

Implementation example				
Lapped part	Material	Rod	Abrasive	Result
Cupule for thigh prosthesis	Chromium cobalt	Shape A Type 992	Stick M.M.143	Sphericity 3 µm

LAPPING SUPPORTS

RODS M.M.® SHAPE B

Our Shape B rods are composed of a 5mm active part fixed to a steel* ensuring great rigidity. Please contact us for dimensions above 200 mm. To machine the rods and use them, the shapes A or B must be tightened in a mandrel one turn mounted on a metal rod (by tapping or gluing).

NOT: The tapping must always remain below the steel* thickness in the case of shapes B. In any case (shapes A or B), the centre of the coating has to be cleared to avoid the dead point. During shaping, it is recommended to recover the chips and dusts to reduce the cleaning time.

*aluminium base on demand

Implementation example

Lapped part	Material	Rod	Abrasive	Result
Safety valve	Satellite	Shape B Type 991	Stick M.M.141	Tightness

**LAPIDARY M.M.® SHAPE C**

Intended to prepare the rods for the machine of special shaped parts.

Implementation example

The Sticks and gels used for an everyday usage are put in bold letters.

Expandable cylindrical rods

The formula for the accuracy of borings. The set is composed of:

- A conical shaft to be mounted on the mandrel.
- A cast iron rod with pinched structure. A helical slot allows the expansion while maintaining its geometric shape. The rod's interior is conical in order to receive the shaft.
- A tube-shaped pushrod is here allows driving the rod on the shaft.

Procedure

The abrasive to be used with the rods is selected according to their tasks:

- Important stock removal: diamond dosing stick M.M.132
 - Super-finishing: diamond dosing stick M.M.142 or 144.
- Lubrication thanks to the M.M.712 fluid.

Use

Results

A 15,9 mm diameter has been drilled on a 38 mm length. After checking, an ovalisation of 4/100th mm has been revealed and a surface condition of 0.5-micron Ra.

First operation
With rod and diamond dosing stick M.M.132: ovalisation reduced to 4/10th micron, surface condition of 0.12-micron Ra.

Second operation
With rod and diamond dosing stick M.M.144: limited ovalisation to 1/10th micron. Surface condition to 0.03-micron Ra.

Alumina abrasive films

High concentration abrasive films. Available in different grains from 0.3 μm to 40 μm , they generate excellent flatness and finishing results. The uniformity of the abrasive layer ensures exceptional regularity of the polishing process and prolonged durability of the disc. Easy to use, high stock removal and polishing quality enables you to significantly reduce your sample polishing time. They can be used with all material types.

Recommended lubricants: FLUIDE 712 water-based or FLUIDE 705 oil-based.

ABRASIVE FILMS IN ROLLS

Films of all types available in rolls with choice of mandrel diameter, width from 1.2 to 100 mm, max length 200 meters.

Diamond abrasive films

High concentration abrasive films. Available in different grains from 0.5 μm to 45 μm , they generate excellent flatness and finishing results. The uniformity of the abrasive layer ensures great regularity of the polishing process and prolonged durability of the disc. Easy to use, the strong stock removal and polishing quality enables you to significantly reduce your sample polishing time. They can be used with all material types.

Recommended lubricants: FLUIDE 712 water-based or FLUIDE 705 oil-based.

POLISHING SUPPORTS

DIALAM diamond discs

The DIALAM supports are diamond composite supports with a high cutting capacity. Usable on single and double-side machines, they are recommended for pre-polishing processes requiring a high level of stock removal on all types of materials.

The DIALAM discs are particularly efficient for the stock removal on very hard materials as sapphires and ceramics.

Type	Characteristics	Ø (mm)	Qty.	Ref.
------	-----------------	--------	------	------

PLATE (coating stuck on a stainless steel)

DIALAM Blue (plate)	High roughness Thickness 3,5 mm	15"/381	1	09 DL140 30
DIALAM Green (plate)	Medium roughness Thickness 3,5 mm	15"/381	1	09 DL150 30

MAGNETIC DISCS (associated with FMS® fixing system)

DIALAM Blue (magnetic)	High roughness Thickness 3,5 mm	15"/381	1	09 DL141 30
DIALAM Green (magnetic)	Medium roughness Thickness 3,5 mm	15"/381	1	09 DL151 30

BOOSTER Lubricant

The Booster Lubricant has been specially developed to optimise the DIALAM's yield. It is distributed (drop by drop) during pre-polishing cycles and allows regenerating the DIALAM disc guaranteeing a regularity of the stock removal cycle after cycle.

Type	Packaging	Qty.	Ref.
Booster Fluid	5 litres	1	07 BP030 40

ABRABLOC Dressing ring

ABRABLOC dressing rings are intended for the dressing the DIALAM disc. They replace advantageously standard abrasive stones usually applied. The Abrablocs correct the plate geometry and brighten the cutting effect of DIALAM discs.

TOUCLAM®

TOUCLAM® polishing cloths

LAM PLAN proposes a new generation of TOUCLAM® polishing cloths. High technological products realised from exclusive materials, these cloths are intended to satisfy high precision demand concerning surfaces and geometry. The TOUCLAM® range is dedicated to aspect polishing and for all other kinds of accurate high quality polishing. Oriented towards industrial applications and research, these cloths integrate new materials and treatments in their manufacturing to facilitate their use and guarantee high quality results. Self-adhesive, their implementation is fast and easy. Available in all diameters.

Composition of TOUCLAM® polishing cloths

A polishing cloth is a complex gathering of various coats of materials, each one having their specific function:

- The active and visible part (1) of a cloth is the primary criteria. It gathers 4 classes, all with different characteristics.
- A coating (2) which defines the cloth's impermeability
- An adhesive film (3) having varying thickness and power of adhesion
- A support (4) defining the rigidity or the softness of the cloth.

For each application, the polishing cloth needs to be associated with the correct abrasive. LAM PLAN proposes 3 families of product: the diamond abrasives NEOLAP®, the composite abrasives ECOA® and the standard abrasive of the AQUA LAM® range.

The combination of these elements will allow to answer the 3 criteria composing the user's specification: stock removal (SR), flatness, finishing or roughness.

TOUCLAM® polishing cloths gathers 4 major classes:

Polyurethanes and Foams

Woven

Non-woven and compressed

Flocked

Structured cloths

The polishing cloths **TOUCLAM® 1PU3 and 1PU4** are available with grooves on their surface in order to improve their performances. Dimensions: 10 x 10 mm and 30 x 30 mm, depth of the grooves: 1 mm.

The polishing cloths **TOUCLAM® 2PC1 and 2PC2** are available with various structures: embossed and quartered (dimensions of the grooves 4,3 x 4,3 mm and 18,4 x 18,4 mm). The action of the abrasive slurry is optimised on the entire surface of the parts.

The principal benefits are:

- Higher stock removal
- Excellent flatness control
- Limitation of the suction effect
- Modulation of the stock removal and surface condition.

Available structures for 1PU3 and 1PU4 with grooved matrix.

1PU4 grooved 10 x 10 mm

1PU4 grooved 30 x 30 mm

Available structure for 2PC1 and 2PC2 with grooved, and embossed matrix.

Grooved 4,3 x 4,3 mm

Grooved 18,4 x 18,4 mm

Embossed

Tailor-made cutting

LAM PLAN masters the production of its polishing cloths. In order to facilitate the use and the application of polishing cloths on your supports, we are capable of providing our discs, already cut to your needs. The geometry of the polishing cloth or pad will correspond perfectly to your fixation support. The cutting quality will be perfect which will guarantee a high durability of your polishing cloth.

We can provide all geometric shapes as the petals illustrated just below. For double-side machines, we make the bore and the holes for the distribution of the abrasive on the superior plate.

CONSUMABLES

DIAMOND SLURRIES

Bio DIAMANT® NEOLAP® abrasive slurries

All the experience of LAM PLAN in a diamond abrasive with incomparable performances. In direct line with our famous Bio DIAMANT® range, the NEOLAP® diamond abrasive slurries go even further in terms of efficiency and user comfort. The NEOLAP® diamond slurry is a top-of-the-range product featuring exceptional performances.

VOC-free products - Respect of users and environment

The products of our Bio DIAMANT® range are biodegradable by more than 70%. Non-toxic and harmless, they are neutral; the user's working conditions are thus respected. Anticipation of new regulations in terms of Volatile Organic Compounds (VOCs). Consolidation of your ISO 14001 and ISO 26000 approach.

Biodegradable packaging - Reduction of your activity's environmental impact

For the first time in the polishing industry, a diamond slurry is packed in a plastic bottle of vegetal origin which is 100% compostable according to standard 13432 (for 400 ml packagings).

High yield - Reduced consumption

After many years of development, LAM PLAN formulated a new range of diamond slurries whose performances are clearly better than those of the old generation of Bio DIAMANT® products.

The comparative tests conducted by LAM PLAN prove it. The results in terms of stock removal are systematically better, which places NEOLAP® at the front of the diamond abrasive market in terms of polishing efficiency and speed.

The wettability of these diamond slurries is specially designed and optimised for NEW LAM® M'M' plates. The ease with which the diamond slurry is spread out over the plate's surface allows obtaining rapidly an excellent abrasive film, which favours an immediate lapping.

NEOLAP®

DIAMOND ABRASIVE LIQUIDS

DIAMOND SLURRIES

Flatness

Contains specific additives to facilitate the mixing of the diamond slurry with the NEOFLUID lubricating fluid and improves the dissipation of heat from the plate during lapping.

Improved roughness

This new generation of diamond abrasive allows obtaining better roughness results while preserving a strong stock removal.

Easy cleaning

With water for NEOLAP® series 300 and 400.

Quality, procurement guarantee and total traceability

Conformity to the REACH regulation

LAM PLAN set up all the arrangements needed for its application in order to guarantee the quality and availability of all its products over the long term. All the substances contained in our preparations comply with the REACH regulation's specifications. To facilitate your administrative formalities, all the Safety Data Sheets (SDSs) of our products conform to the legislation in force can be downloaded from www.lamplan.fr/fds.

Availability in monocrystalline and polycrystalline forms

Series 100 emulsion - monocrystalline.

Series 300 water base - monocrystalline.

Series 400 water base - polycrystalline.

DIAMOND SLURRIES

Diamond slurries 241 series

High performance, oil-based polycrystalline diamond abrasives.

The high lapping performances of these products allow obtaining excellent results in terms of brightness and roughness on very hard materials, such as ceramics or silicon carbide.

Containing additives which limit the diamond's settling out, the suspension of these abrasives is thus facilitated and very rapid, which guarantees a perfect homogenisation of the product before usage.

These ready-to-use- products can be used with the lubricating fluid MM990-140 or MM950-140.

The formulation of these diamond slurries is particularly adapted to materials sensitive to water.

Parts are cleaned with Stanol or detergent 742.

ECOa®

Multi abrasives
Double side polishing
Custom-made formulas
Packaging 5 L

Conform to the REACH regulation

LAM PLAN established solutions to guarantee quality and availability of all its products on the long run. All the substances present in our preparations respond to the specifications of the REACH regulations. In order to facilitate your administrative process, all the safety data sheet (SDS) of our products are in compliance with the current legislation.

ECOa® abrasive slurries

New ranges of liquid slurries for double plate machines. The ECOa® range is carrying all LAM PLAN's knowledge in terms of classic and diamond slurries applied for polishing and super-finishing on double plate machines. It is the guarantee of an efficient response to various materials.

Ready-to-use high quality industrial products

The manufacturing and the packaging are adapted to the constraints and consumption encountered in industrial production polishing.

Control your VOC emission

For many years, the LAM PLAN R&D department has been committed to develop new products respecting the user's health but also the environment without compromising the efficiency. Composed with a specific new generation binder, this slurry is VOC free (Volatile Organic Compounds).

Improved technical performances

The abrasive film, specially elaborated for double side lapping polishing assures a good distribution of the slurry on the polishing supports. The new generation formulations reduce heating during the polishing process and keep the abrasive film wet.

Improved roughness

The varied ECOa® range guarantees the best results with a high stock removal on all materials.

Easy cleaning

Specially conceived to limit and distribute the polishing residues, the ECOa® liquids can be washed easily with water or with aqueous detergents.

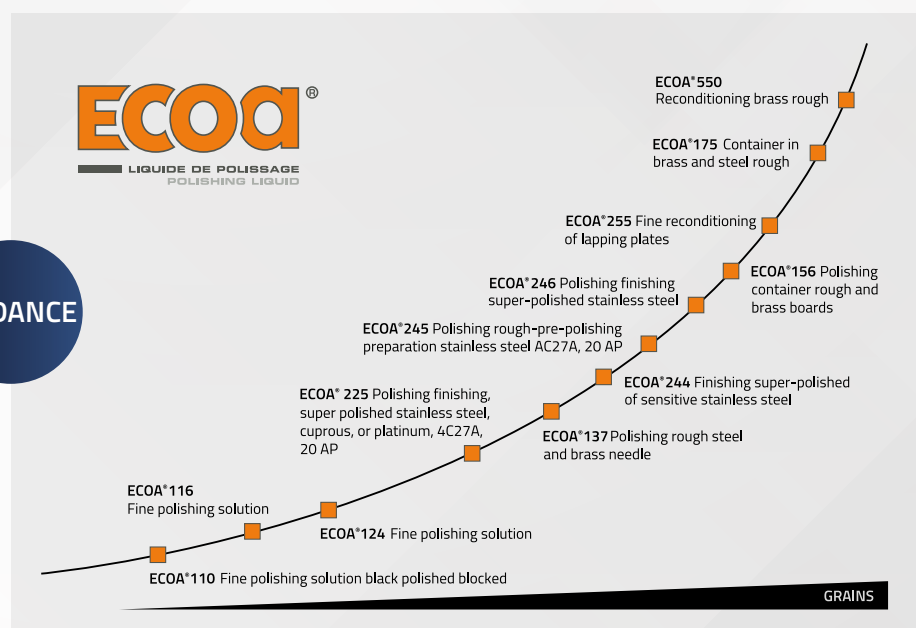

Respect the users and the environment

The products of the ECOa® range are biodegradable by more than 70%. Nontoxic and harmless, the users' working condition are thus respected. Also anticipating the new regulations concerning greenhouse gas emission. Consolidation of your ISO 14001 and ISO 26000 approach.

Supply guarantee and total traceability

GUIDANCE

DIAMOND SLURRIES

Stick Bio DIAMANT® M.M.140 A

Diamond pastes dosing stick for the finishing of watch parts.

Characteristics

The Bio DIAMANT® M.M.140 A stick is constituted of a solid chemical binder, soluble in water and oil. The Bio DIAMANT® M.M.140 A stick can be used with the M.M.712 fluid (water base) or with the M.M.705 fluid (oil base).

Applications

Particularly recommended for the watch parts. Easy to use, its yield and its abrasive quality allows obtaining exceptional results well known in this branch of industry. Its pairing with TOUCHLAM® polishing cloths authorises the final polishing of various materials and principally the ones used in the watchmaking field (brass, silver, stainless steel, stavax, coating, etc.). It is often used in restoring terminated parts, to remove micro-scratches, it can also be integrated in a complete production polishing process.

Use and presentation

This stick is intended for manual use. The accurate dosing of the paste distribution is insured by a graduated drum. Each division represents 0.2 gram.

This system allows loading any new polishing cloth with a perfectly repetitive material without direct contact with the product.

Bio DIAMANT® Sticks

The sticks allow controlling the dosage in manual usage on lapping plates.

The diamond paste is distributed according to an accurate dosage, thanks to a drum, graduated every 0.2 g. The loading of the paste on the plate is insured to be repetitive and without finger contact.

SERIES M.M.130-140

Extra concentrated in monocrystalline diamond, these high performance sticks allow a high and fast stock removal on all types of materials. Their high concentration facilitates also the rapid acquisition of flat and shiny surfaces. The cleaning is done with water or detergent 742.

The M.M.130 series sticks are used for ROUGH operations.

The M.M.140 series sticks are used for FINISHING operations.

Fluids

NEOFLUID

Lubricating fluid recommended for Bio DIAMANT® NEOLAP® slurries. Formulation without volatile organic compounds (VOCs) and without dangerous substances, this biodegradable fluid is adapted for the lapping and polishing of most materials. It allows controlling perfectly the heating of the lapping plates during production cycles, thereby guaranteeing excellent flatness. Its association with the Bio DIAMANT® NEOLAP® slurries guarantees a stable, uniform abrasive film during the various work processes. Its active principles protect materials sensitive to corrosion.

Packaging	Ref.
1 litre	07 NEF10 30
5 litres	07 NEF10 40

M.M.712

Aqueous lubricating fluid recommended with the Bio DIAMANT® series 122 and M.M.130-140, and liquid series M.M.330-340. It is compatible with the new Bio DIAMANT® NEOLAP® slurries series 300 and 400. Ready to use, its specific formula prevents the support from heating and facilitates the cleaning of parts with water or by adding the detergent 742.

M.M.705

Lubricating fluid to be used with the diamond compounds series 210. Ready-to-use, it ensures an excellent dispersion of the compound and optimises its lapping power. Cleans easily with the detergent 742 or Stanol.

Packaging	Ref.
1 litre	07 MM705 30
Pulmatic 350 cc	07 MM705 50

M.M.990-140

This lubricant fluid is recommended for usages with the diamond slurries series 241P. Ready-to-use, its low viscosity creates a very fine abrasive film during the work process, which ensures a high lapping efficiency. It is compatible with the new Bio DIAMANT® NEOLAP® series 100 and M.M. 130-140. Use the detergent 742, Stanol or apply solvents to clean the parts.

Packaging	Ref.
1 litre	07 MM711 30
5 litres	07 MM711 40

M.M.950-140

Oil-based lubricating fluid. Due to its low evaporation rate, it is recommended for large lapping or polishing support. This fluid is not subjected to the regulation on the transport of dangerous materials (ADR, IMDG, IATA).

Packaging	Ref.

COMPOSITE ABRASIVES

CLASSICAL composite abrasive

A high-performance product which has proven its adaptability to all usage, especially for large tanks and intensive usage. According to the concentration intended, 1 litre of abrasive solution allows obtaining between 5 and 10 litres of abrasive.

Advantages

- Increasing working speed.
- Easy resuspension of the mixture.
- Soft abrasive film, efficient and balanced.
- Very low smell.
- Low running costs.
- Easy cleaning. Detergent 711-103.
- Ingenious packaging: packs 2 x 2 litres stackable and 4 x 2 litres (reduced handling). Concentrated abrasive slurry, easy-to-use and easy cleaning.

1 pack of 2 x 2 litres = 20 to 30 litres of solution. These products allow working with abrasive concentration adjustable to usage. Requiring a brewing while using it. Easy resuspension. Compatible with the additive 716.

Biodegradable

BIOLAM® composite abrasive

A new generation of biodegradable abrasive slurries developed by our Research and Development services. Very useful for the lapping machine equipped with a medium size tank.

Advantages

- Easy to use and to put in work.
- Low decantation of the abrasive, regularity of results.
- Consistent and ready abrasive film.
- No dangerous substances.
- Low running costs.
- Very low smell.
- Simple and easy cleaning (ex: water or water + ordinary detergent).
- Compact packaging: 2 and 20 litres jerrycans other packaging on demand.

BIOLAM® PLUS TO DILUTE AND BIOLAM S READY-TO-USE

Plus: Smooth abrasive slurry, no smell, biodegradable, easy to clean. Limited decantation, no additive needed. dilute 1 to 5 times in water.

S: Biodegradable and no smell liquid slurry, non-toxic. Easy to clean. Simple usage: to put directly in the abrasive tank of the machine, limited decantation. Depending of the use can be used pure or can be diluted up to 2 times in water.

BIOLAM® Oxyde d'aluminium (Al₂O₃)

BIOLAM® PLUS to dilute

BIOLAM® Cerium oxyde (CeO₂) liquid

Finishing Liquid for the finishing on glass, sapphire and plastic. Dilute 2 to 5 times in water. 2 litres tin.

BIOLAM®PLUS to dilute

Container of 2 litres		
FEPA	µm	Ref.
1200	3	I003 V92L1
1300	2	I002 V92L1
1400	1	I001 V92L1

The composite abrasives BIOLAM® are also available in boron carbide (B₄C) and cerium oxide (CeO₂).

Other grains on demand.

**Dilution of AQUALAM® CLASSIC and BIOLAM®PLUS solutions**

- 1 part concentrated abrasive product
- 2 parts ADDITIVE 716
- 4 parts tap water

ADDITIVE 716 optimises the abrasive film and protects the parts and the cast iron plate from corrosion.

GUIDANCE

Super-finishing
Polishing on cloth discs
Simplified cleaning

AQUA LAM® colloidal silica

The colloidal silicas are stabilised suspensions with fine non-agglomerated spherical particles. This aqueous solution contains a high concentration of nanoscale silica.

During usage, colloidal silicas are generally diluted in water to proportions between 10 and 50%. We advise a 20% dilution in water for an optimum use.

These products are always used for super-finishing.

S.W. 30

Chemical-mechanical abrasive for compatible material
Super-finishing standard liquid to use pure or diluted up to 50%
Silica concentration: 30%
Size of particles: 30 nm
pH = 10

Packaging	Ref.
5 litres tin	Z000 A25L1
10 litres tin	Z000 A2010

S.W. 36

Silica concentration : 50%
Size of particles : 50 nm
pH = 9

Packaging	Ref.
5 litres tin	Z000 C55L1
10 litres tin	Z000 C5610

NOVAL S FINISHING

Super-finishing liquid. Obtaining ultra-low roughness
Contains an additive "anti-crystallisation" which facilitate the cleaning of the parts and the machines. Silica concentration : 30%
Size of particles: 30 nm
pH = 10

Packaging	Ref.
5 litres tin	Z000 F75L1
10 litres tin	Z000 F7010
20 litres tin	Z000 F7020

NOVAL CONCENTRATED

Formulated to be added to pure colloidal silica
Additive that cancels crystallisation and decantation of the pure colloidal silica pure
Increases the stock removal, powers the roughness
Silica concentration: 35%
Size of particles: 30 nm
pH = 9

Packaging	Ref.
10 litres tin	Z000 F8010
20 litres tin	Z000 F8020

COMPOSITE ABRASIVES

Abrasive compounds BIOLAP®

Concentrated fluid abrasive pastes. Oil base, auto-lubricants, intended for the lapping of parts between them and/or cylindrical lapping.

Biodegradables, no smell, no dangerous substances.

Advantages

- VOC free
- No water spots
- Alumina base, silicon carbide or boron carbide
- Grains from 0,05 to 125 microns
- Biodegradable products
- Low viscosity
- Packaging: in 50 and 250 cm³ pots

GUIDANCE

Dilution of AQUALAM® CLASSIC and BIOLAM®PLUS solutions

- 1 part concentrated abrasive product
- 2 parts ADDITIVE 716
- 4 parts tap water

ADDITIVE 716 optimises the abrasive film and protects the parts and the cast iron plate from corrosion.

COMPOSITE ABRASIVES

Abrasive compounds CLASSIC

High concentration abrasive compound. Optimises the texture of the abrasive film in order to obtain a rapid, maximal and extended abrasion. Non greasy, miscible to water and to the additive 716.

AQUA LAM® Al₂O₃ powder

ALUMINIUM OXIDE

Commonly called "polishing alumina", chemical symbol Al₂O₃. They are composed of various family: purified aluminas, melted aluminas, calcinated aluminas, submicron aluminas. Their choice is defined according to result criterias and economical expectancies. Grains included between 0,03 micron and 200 microns.

AQUA LAM® SiC powder

SILICON CARBIDE

The silicon carbide is a pure chemical corps, chemical symbol SiC. The grains are grey, green or black. The grain F1500 used for specific super-finishing is grey.

The silicon carbide AQUA LAM® endures a special treatment and a separation under a high magnetic intensity to insure a dusting and a maximal cleaning. AQUA LAM® proposes all the grains FEPA F useful in lapping, from F60 (250 microns) to F1200 (3 microns).

COMPOSITE ABRASIVES

AQUA LAM® CeO₂ powder**CERIUM OXIDE**

Chemical symbol CeO₂. Used in super finishing mostly for the polishing of glass (example BK7, 520 knoops) the cerium oxide reduces the roughness by a chemical and mechanical actions. Selected according to its maximum polishing action, the cerium oxide AQUA LAM® has grains from 3 to 0,5 microns (other grains dimensions on demand).

**Additive**

Additive for liquid preparations CLASSIQUES and BIOLAM®PLUS allowing an optimisation of the abrasive film (more resistant) without reducing the lapping power. Can be used in the preparation of the abrasive solution in addition to water.

Preserves the parts and the cast iron tray from corrosion.

EQUIPMENT

MICROMOTORS

Upgradeable micromotor controllers

M.M.880 CONTROLLER for micromotors with foot pedal regulator

Powerful controller for micromotors, suitable for intensive use in all types of deburring and polishing tasks. The M.M.880 is equipped with 2 outputs, which can be used alternatively. Variable speed controlled manually or by the supplied foot pedal controller. Dual direction of rotation with automatic overload protection. A torque management function guarantees a constant speed of rotation of the polishing tool, regardless of the pressure applied by the operator. Quick stop of the rotation when switched off.

Supplied accessories: foot pedal regulator, 2 handpiece holders.

Compatibility: all micromotors, except M.M.886, ultrasonic head and turbo engines.

M.M.880 CONTROLLER Data sheet

Type	for rotary and alternative engines	Voltage output	DC3-30 V (2 outputs)
Dimmer switch	manual on controller and pedal	Dimensions W x H x D	170 x 110 x 195 mm
Direction of rotation	2	Weight	2,1 kg
Voltage supply	AC 230 V - 50/60 Hz - 30 VA	Reference	10 88030 00

M.M.885 CONTROLLER for micromotors and ultrasound

Powerful controller for ultrasonic micromotors and handpieces, suitable for heavy duty use in all types of deburring and polishing tasks. An automatic feed system is incorporated to adjust the frequency to suit the ultrasonic tool being used. Variable speed for the micromotors, controlled manually or by foot pedal controller (optional). Dual direction of rotation with automatic overload protection. A torque management function guarantees a constant rotation speed of the polishing tool, regardless of the pressure applied by the operator. Quick stop of the rotation when switched off.

Accessories supplied: 2 handpiece holders.

Compatibility: all micromotors and ultrasonics except M.M.886 and turbo engines.

M.M.885 CONTROLLER Data sheet

Type	for rotary, alternative and ultrasonic engines	Voltage output	DC3-30 V 0,3 A - Ultrasonic AC 6-60 V 22,6 KHz
Dimmer switch	manual on controller and pedal (in option)	Dimensions W x H x D	170 x 110 x 195 mm
Direction of rotation	2	Weight	2,6 kg
Voltage supply	AC 230 V - 50 Hz - 30 VA	Reference	10 88530 00

FOOT PEDAL REGULATOR FOR M.M.880 AND 885

In combination with the M.M.880 and M.M.885 controllers, the pedal regulator provides on/off and foot speed control functions.

FOOT PEDAL REGULATOR Data sheet

Fonctions	Start/stop and dimmer
Dimensions W x H x D	90 x 75 x 190 mm
Cable	L 1,85 m
Weight	490 gr
Reference	10 88034 00

Our know-how in the design of diamond abrasives associated with a wide range of supports and toolings allows us to respond to all requests concerning the polishing of components with complex geometries.

MICROMOTORS

M.M.886 CONTROLLER AND MICROMOTOR PACKAGE

Complete set including 1 M.M.886 CONTROLLER and its compatible rotary MICROMOTOR. Variable speed controller with two directions of rotation and automatic protection in case of overload. A torque management function guarantees a constant speed of rotation of the polishing tool, regardless of the pressure applied by the operator.

Supplied accessories: spare fuse (UF-1A), other accessories see M.M.886 micromotor description.

Compatibility: M.M.886 micromotor only. Controller not compatible with foot pedal controller.

**M.M.886 CONTROLLER Data sheet**

Type	for M.M.886 rotary engine	Voltage output	DC3-30 V - 0,2 à 0,4 A
Dimmer switch	3 000 to 20 000 tr/min.	Dimensions W x H x D	130 x 85 x 162 mm
Direction of rotation	2	Weight	1,5 kg
Voltage supply	AC 230 V - 50/60 Hz - 23 VA	Reference	10 88630 00

MICROMOTOR (only) FOR M.M.886 CONTROLLER

Handpiece specific to the M.M.886 CONTROLLER, monobloc micromotor type with stainless steel body. Lightweight and well-balanced, its variable speed of rotation from 3000 to 20,000 rpm is suitable for all common deburring and polishing situations. Supplied with 3 interchangeable quick-clamping jaws compatible with all types of rotary tooling.

Accessories supplied: 1 support for micromotor, tools for changing jaws and maintenance, 1 set of replacement carbons, 3 jaws \varnothing 2.35 - 3.00 - 3.175 mm.

Compatibility: only with M.M.886 controller.

**M.M.886 MICROMOTOR Data sheet**

Type	Rotary micromotor for M.M.886	Voltage output	DC3-30 V - 0,2 à 0,4 A
Speed	3 000 to 20 000 tr/min.	Dimensions	\varnothing max. 24 mm, L 128 mm
Torque	n.c.	Weight (without cable)	180 gr
		Reference	10 88630 20

Diaphragm compressor

Diaphragm compressor for laboratories which are not equipped with a compressed air network. Silent operation.

Output	Pressure	Dim. W x H x D	Ref.	
50 l/min	8 bar	330 x 500 x 330 mm	60 COM00 00	#

Rotary micromotors

STRAIGHT RED ROTARY MICROMOTOR

Rotary motion handpiece with standard head. Lightweight and well balanced, its variable speed of rotation from 3000 to 30,000 rpm is suitable for deburring and polishing situations.

Accessories supplied: 1 support for micromotor, tools for changing jaws and maintenance, 1 set of replacement carbons and 2 interchangeable quick-clamping jaws compatible with all types of rotary tools \varnothing 2.35 - 3.00 mm.

Compatibility: M.M.880 and M.M.885 controllers

STRAIGHT RED ROTARY MICROMOTOR Data sheet

Type	Rotary micromotor	Voltage output	DC3-30 V - 0,2 à 0,4 A
Speed	3 000 to 30 000 tr/min.	Dimensions	\varnothing max. 31,6 mm, L 170 mm
Torque	6,5 Ncm	Weight (without cable)	295 gr
Compatible jaws \varnothing	3,175 mm	Reference	10 88040 00

STRAIGHT RED ROTARY MICROMOTOR WITH REINFORCED HEAD

Rotary handpiece with reinforced head, modular micromotor type. For difficult milling operations with high vibration and pressure loads.

Accessories supplied: 1 micromotor support, tools for changing jaws and maintenance, 1 set of replacement carbons and 2 interchangeable quick-change jaws \varnothing 6.00 - 3.00 mm.

Compatibility: M.M.880 and M.M.885 controllers

STRAIGHT RED ROTARY MICROMOTOR WITH REINFORCED HEAD Data sheet

Type	Rotary micromotor	Voltage output	DC3-30 V - 0,2 à 0,4 A
Speed	3 000 to 30 000 tr/min.	Dimensions	\varnothing max. 31,6 mm, L 175 mm
Torque	6,5 Ncm	Weight (without cable)	360 gr
Compatible jaws \varnothing	3,175 mm	Reference	10 88041 00

«SUPER LIGHT» ROTARY MICROMOTOR

Lightweight, one-piece micromotor type handpiece. For finishing operations, polishing, deburring, engraving, grinding, limiting operator fatigue.

Accessories supplied: 1 support for micromotor, tools for changing jaws and maintenance, 1 set of replacement carbons and 2 interchangeable quick-clamping jaws \varnothing 2.35 - 3.00 mm.

Compatibility: M.M.880 and M.M.885 controllers

«SUPER LIGHT» ROTARY MICROMOTOR Data sheet

Type	Rotary micromotor	Voltage output	DC3-30 V - 0,2 à 0,4 A
Speed	2 000 to 20 000 tr/min.	Dimensions	\varnothing max. 27,5 mm, L 145 mm
Torque	6,5 Ncm	Weight (without cable)	200 gr
Compatible jaws \varnothing	3,175 mm	Reference	10 88042 00

GREEN BENT 90° ROTARY MICROMOTOR

Handpiece, modular micromotor type with reinforced head with 90° angle transmission. For finishing operations, generally used with polishing discs.

Accessories supplied: 1 support for micromotor, tools for changing jaws and maintenance, 1 set of replacement carbons and 2 interchangeable quick-clamping jaws \varnothing 2.35 - 3.00 mm

Compatibility: M.M.880 and M.M.885 controllers.

GREEN BENT 90° ROTARY MICROMOTOR Data sheet

Type	Rotary micromotor	Voltage output	DC3-30 V - 0,2 à 0,4 A
Speed	1 500 to 15 000 tr/min.	Dimensions	\varnothing max. 31,6 mm, 45 x 160,5 mm
Torque	8,8 Ncm	Weight (without cable)	380 gr
Compatible jaws \varnothing	3,175 mm	Reference	10 88046 00

MICROMOTORS

GREEN BENT 120° ROTARY MICROMOTOR

Handpiece, micromotor type with reinforced head with 120° angle transmission, for finishing operations, generally used with polishing discs.

Accessories supplied: 1 micromotor holder, tool for changing jaws and maintenance, 1 set of replacement brushes, 2 interchangeable quick-release jaws Ø 2.35 - 3.00 mm.

Compatibility: M.M.880 and M.M.885 controllers

**GREEN BENT 120° ROTARY MICROMOTOR Data sheet**

Type	Rotary micromotor	Voltage output	DC3-30 V - 0,2 à 0,4 A
Speed	1 500 to 15 000 tr/min.	Dimensions	Ø max. 31,6 mm, 47 x 169 mm
Torque	8,8 Ncm	Weight (without cable)	385 gr
Compatible jaws Ø	3,175 mm	Reference	10 88047 00

Alternating micromotors**BLACK FILING MICROMOTOR**

Handpiece, modular micromotor type with straight head with angular movement (sweeping). For finishing operations, generally used with diamond stones and files.

Accessories supplied: 1 support for micromotor, tools for changing jaws and maintenance, 1 set of replacement carbons and 1 jaw Ø 2.00 to 4.7 mm.

Compatibility: M.M.880 and M.M.885 controllers

**BLACK FILING MICROMOTOR Data sheet**

Type	Scanning alternating micromotor	Voltage output	DC3-30 V - 0,2 à 0,4 A
Speed	800 to 8 000 osc./min.	Dimensions	Ø max. 31,6 mm, 182 mm
Torque	6,5 Ncm	Weight (without cable)	316 gr
Compatible jaws Ø	1,6 mm	Reference	10 88045 00

GREY FILING MICROMOTOR

One-piece motor type handpiece with longitudinal pistol grip for finishing operations, generally used with wood or felt lapidaries.

Accessories supplied: 1 support for micromotor, tools for changing jaws and maintenance, 1 set of replacement carbons and 1 jaw Ø 2.00 to 6.35 mm.

Compatibility: M.M.880 and M.M.885 controllers

**GREY FILING MICROMOTOR Data sheet**

Type	Linear alternating micromotor	Voltage output	DC3-30 V - 0,2 à 0,4 A

Ultrasonic micromotor

ULTRASONIC HEAD

Handpiece, one-piece ultrasonic micromotor type. Compact and lightweight, ergonomically designed to improve efficiency. Applications include finishing of plastic moulds, die castings, ceramics, non-ferrous and precious metals. Ideal for deburring, polishing and removing EDM burrs.

Accessories supplied: 1 micromotor support, tools for changing jaws and maintenance, 1 diamond file, 1 interchangeable Ø 3 mm quick-clamping jaws and 2 collets, thickness 0.5 and 1 mm.

Compatibility: M.M.885 controller

Turbomotors

M.M.888.4 LINEAR TURBOMOTOR

Turbomotor providing high torque and speed. With a stroke of 0.7 mm and a movement frequency of 350 strokes/sec. Mainly made of lightweight composite materials, this turbo motor allows easy working for a long time without fatigue or overheating. Integrated on/off control ring.

Supplied accessories: 1 x 1.50 m hose with clamps, 1 x hose holder, 1 x key, 1 x ceramic stone and 1 x multi-purpose jaw for \varnothing 3 and 3 x 10 mm max.

M.M.888.4 Data sheet

Type	Linear alternating micromotor	Air consumption	46 NL/min.
Frequency	0 à 22 000 coups/min.	Power supply	Compressor 60 COM00 00 or compressed air network 6 Bar flow rate higher than 70 NL/min.
Pressure	6 bars	Dimensions	\varnothing max. 28 mm, 218 mm
Course	0,7 mm	Weight	180 gr
Connector	PT 1/4	Reference	10 88840 00

M.M.888.3 ROTARY TURBOMOTOR

Turbomotor is made of composite materials and is particularly thin and light, allowing easy working for a long time without fatigue or overheating. Integrated on/off control ring.

Supplied accessories: 1 x 1.50 m hose with clamps, 1 x hose holder, tools, 1 x \varnothing 10 mm grinding wheel and 1 x \varnothing 3 mm jaw.

M.M.888.3 Data sheet

Type	Rotary micromotor	Air consumption	120 NL/min.
Speed	65 000 tr/min.	Power supply	Compressed air network 6 Bar flow rate higher than 150 NL/min.
Pressure	6 bars	Dimensions	\varnothing max. 22,50mm, 218 mm
Course	0,7 mm	Weight	78 gr
Connection	PT 1/4	Reference	10 88830 00

Maintenance and repairs

In order to always get the best and to prolong the life of your equipment, LAM PLAN offers you preventive and curative maintenance services on all its range of shape polishing equipment.

Do not hesitate to contact your usual contact person, after taking charge of your project in our workshops, we will draw up a personalised estimate.

Diamond grinding points

Accurate grinding, deburring, levelling, etching.
Advantages in comparison with corundum grinders: better surface finish and low wear and tear with small diameters or points. High durability.

Diamond files

Diamond files are electroplated, the quality of the coated diamond guarantees even stock removal. The manufacturing process results in long durability. These tools are mainly used for manual work, pre-polishing or fine deburring. They can also be mounted in filing or ultrasonic devices. Their length can be reduced simply by cutting with a diamond disc.

Rubberised abrasive grinders

Prepolishing. Rubberised abrasive grinders easily adapt to the of the surface being worked and are used to polish complex shapes (for example: angles, thread, depths). They are also used for fine deburring.

CONSUMABLES

Diamond abrasives, paste, liquid and gel abrasive preparations.
Lubricating fluids for oil or water base.

DIAMOND ABRASIVES

DIAMOND ABRASIVES

Bio DIAMANT® Pulmatic liquids

Used to obtain good distribution of diamond abrasive when polishing large surfaces.
Rechargeable pack, non-aerosol.

Bio DIAMANT® Gels

The Bio DIAMANT® formula ensures even distribution of abrasive film, as well as excellent adhesion to the item being polished.

Ready to use, this gel is ideal for maintenance polishing and produces an excellent shine. Very fast diamond action.

DIAMOND ABRASIVES

Bio DIAMANT® Pastes

Bio DIAMANT® products present no risk of toxicity or noxiousness to the user's health.

During the development of Bio DIAMANT® products, chemical components are selected exclusively from substances classed as non-dangerous complying with REACH regulations (relating to the packaging and labelling of dangerous substances and preparations causing skin irritation).

Environmental compliance

Our Bio DIAMANT® products are biodegradable.
Safety data is available for all products complying with REACH regulations

Identification

You can identify the series and therefore the solubility, Grit texture and concentration of each Bio DIAMANT® paste according to the type (e.g. 6 103).

Series 100 water soluble.

Series 210 oil soluble.

Example of type identification

Paste type	Grit texture	Series	Concentration
6 103	6 microns	100	3

BIO DIAMANT® pastes SERIES 210 - 10 g

Very high performance diamond paste for polishing hard and extra hard materials.

Available in a wide range of grain sizes from 1 to 90 µm. Does not contain water, protects polished surfaces from corrosion. Cleaning is done with water + 742 detergent or with a solvent such as Stanol.

1 piece

High yielding abrasives for polishing hard and extra-hard materials.
Fluidity enables use without lubricating fluid.

High performance
Oil soluble

BIO DIAMANT® pastes SERIES 100 - 10 g

Diamond paste for finish polishing of all materials.

Suitable for polishing stages up to optical polishing on soft substrates.

BIO DIAMANT® SERIES 100 paste is available in a wide range of grit sizes down to very small ones and requires the use of M.M.712 - WS water based fluid. Cleaning is done with water + lye 742 or alcohol.

Extreme polish
Water soluble
Available in different concentrations

All stages up to optical polishing possible.

BIO DIAMANT® pastes 205S - 20 g

High performance diamond paste for mould polishing.

Excellent adhesion to material surfaces, very good temperature resistance, can be used on hot surfaces up to 170°C.

Due to its lubricating properties, no lubricant is required. Does not contain water, protects polished surfaces from corrosion. Cleaning is done with water + 742 detergent or with a solvent such as Stanol.

Can be used on hot surfaces up to 170°C

DIAMOND ABRASIVES

BIO DIAMANT® pastes POLILAM MS - 10 g

Universal diamond paste for lapping and polishing of metal parts.

Bio DIAMANT® POLILAM MS abrasive paste is made from high purity, narrow-gauge single crystal diamond. The concentration of abrasive is of the standard type, and the thick, creamy consistency of the abrasive ensures good bonding to the work surface.

Its fatty bond allows it to be used pure or with M.M.705 - OS oil-based fluid. contains no water, protects polished surfaces from corrosion.

Cleaning is done with water + 742 detergent or with a solvent such as Stanol.

Economical and versatile

GENERAL TERMS AND CONDITIONS OF SALE

1. Application of General Terms & Conditions of Sale

All orders placed with Lam Plan imply acceptance by the client, without any reservation, of all the General Terms and Conditions of Sale as set forth here below.

Client orders shall be registered by Lam Plan only in accordance with these General Terms and Conditions of Sale, regardless of contrary provisions, if any, that may be contained in the purchase order or in the general terms and conditions of purchase of the client, unless they have been expressly accepted in writing by Lam Plan.

The waiver by Lam Plan of one or more provisions of these General Terms and Conditions of Sale does not imply the waiver of any other provisions thereof which shall remain effective and binding upon the client.

The present General Terms and Conditions of Sale may be amended at any time without prior notice by Lam Plan, with the amendments thereafter being applicable to all subsequent orders.

The Client acknowledges being fully aware that their agreement with respect to the contents of these General Terms and Conditions of Sale does not require their signing of this document.

2. Orders

The sale shall be deemed to have been completed only upon acceptance of the order from the client by Lam Plan.

The products shall be supplied and invoiced at the relevant price rates in effect at the time of placing of the order or, where applicable, in accordance with the specific commercial proposal addressed to the client and accepted by them.

Any eventual amendments to the order subsequently made by the client shall be taken into account, only within the limits of the possible options available and at the sole discretion of Lam Plan, and provided that they have been notified in writing to Lam Plan at least fifteen days prior to the date scheduled for delivery, accompanied with the issuance of a new specific purchase order duly signed by the client, including, where appropriate, a price adjustment.

3. Prices

The prices indicated in the Lam Plan catalogues are provided for illustrative purposes only and are not binding upon Lam Plan.

Appropriate invoices shall be issued in accordance with the price rates in force on the date of the order.

Unless otherwise specified in writing, all rates and prices are expressed in Euro and quoted net, ex works, exclusive of taxes and packaging.

As a consequence, the client shall bear all costs related to VAT at the applicable rate, transportation costs, fees and duties as well as any expenses associated with insurance.

Special pricing terms and conditions may be applicable depending upon the specifications requested by the client, particularly concerning the specific modalities, terms and timelines of delivery, timing and terms and conditions of payment.

In this event a special commercial offer shall be prepared and sent to the client by Lam Plan.

4. Payment

The quoted price shall be payable in full in one single payment within a period of thirty days from the date of issue of the invoice, end of the month.

In case of late payment, Lam Plan may suspend any pending orders without prejudice to the application of late payment penalty fees that will be due as of the day following the settlement date as indicated on the invoice, applicable on the full amount/s due, calculated at three times the interest rate in effect on the date of implementation of this provision and applied by the European Central Bank.

Moreover, and in accordance with Article L 441-6 of the Code de Commerce (French Commercial Code), in addition to late payment penalties, the client shall be required to pay a lump sum amount of 40 Euros for recovery costs, with Lam Plan however, reserving the right to seek additional compensation on upon presentation of supporting documentation, corresponding to the recovery costs incurred, in excess of the lump sum amount.

5. Retention of Ownership Title

Lam Plan retains the right to reserve ownership title of the goods delivered to the client until payment has been made in full, inclusive of principal, interest and ancillary costs.

However, the risks relating to the goods shall be transferred to the client immediately upon delivery and, for the entire period of time corresponding to the Retention of Ownership Title by Lam Plan.

Client shall agree, therefore, to take out appropriate insurance policies to provide adequate coverage against the risk of loss, theft or destruction of the goods prior to full payment being made.

Without prejudice to any subsequent action or claim for compensation for damages, Lam Plan may terminate the sale, with the aforementioned goods being subject to repossession in totality by Lam Plan without prior notice provided thereof, in the event of non payment of any invoices that become due.

The client shall refrain from pledging as collateral or assigning ownership of the said goods until such time as they have fully settled the payment corresponding to the price thereof.

In the event of the client becoming the subject of bankruptcy proceedings or getting involved in any other event making it impossible to pay for the goods delivered by Lam Plan and where the goods were to be sold in part or whole by the client to a subsequent purchaser, without the subsequent purchaser being discharged from the liability of paying the sale price, with respect to the client, the client shall agree to promptly provide Lam Plan with all information necessary for Lam Plan to make any eventual claim on the goods, against the corresponding claim related to the sale price still owed by the subsequent purchaser.

6. Delivery

Delivery dates and time lines are purely indicative, provided only for informative purposes and as such, are in no way guaranteed.

In this regard, Lam Plan's obligation is an obligation in terms of means and not an obligation in terms of result.

As a consequence, possible delays in delivery therefore may not be considered grounds for the cancellation of the order, refusal of the goods, the allocation of penalties or any claim for compensatory damages.

Lam Plan shall therefore not be held responsible for any delays in or suspension of delivery, errors, disruptions attributable to their service providers, contractors and / or subcontractors, or due to any unforeseeable fortuitous circumstances or force majeure events, as recognised by the French courts.

The Lam Plan warehouses shall constitute the place of delivery.

This rule shall not be subject to any derogation whatsoever on account of the management, in whole or in part, of the transportation of goods by Lam Plan.

In such a case, Lam Plan shall act in the capacity of a mere agent of the client, with the transportation risks being entirely borne by the client.

Unless otherwise stipulated in relevant provisions, the goods shall be transported at the sole risk and expense of the client, by carrier, and shall be delivered to the address indicated by them in the purchase order.

The client shall be responsible for checking and verifying the condition of the goods upon receipt.

In the event of goods that are missing or that have been damaged in transit, the client shall undertake to express all the necessary reservations on the delivery note or transportation waybill, upon receipt of the said goods.

In addition, these reservations must be confirmed to the carrier in accordance with Article L 133-3 of the French Commercial Code, in writing, within three days following the receipt of goods, by registered letter with acknowledgment of receipt.

It shall be up to the client to exercise their rights in respect of any eventual claims against the carrier or carriers.

6bis. Return

Returns of goods for other reasons than non-conformity may be made within 15 days from the date of receipt of the delivery, subject to prior written notification by the customer.

The shipping or return costs are at the customer's expense. The return of the product(s) must be made in its original packaging and in good condition. All damaged, spoiled, incomplete or soiled products will not be refunded. LAM PLAN reserves the right to decide whether or not to issue a refund after quality control.

7. Limited warranty

New materials and equipment sold by LAM PLAN are guaranteed against any manufacturing risk for a period of one year from the date of invoice of the delivered material.

The purchaser is obliged to check the condition of the materials and equipment immediately after receipt and must notify LAM PLAN within 10 days after receipt if any defects are discovered.

LAM PLAN then undertakes, at its own discretion, to remedy any malfunction during the warranty period, either by repairing the product, replacing the product or refunding the purchase price, provided that the materials and equipment have been used in normal conditions, with LAM PLAN brand products and with regular maintenance.

The warranty does not cover repairs due to:

- the use of materials supplied by the customer or of a design imposed by him;

- incidents due to fortuitous events or force majeure, normal wear and tear of the product, negligence of the customer, lack of supervision or maintenance, or non-conforming, inappropriate or improper use;

- storage or packaging conditions that do not comply with professional rules and practices or with the specificities of the product;

- defects in assembly or implementation by the customer, or the actions of a third party;

- modifications or repair work carried out by the customer or a third party without the prior written authorization of LAM PLAN.

Furthermore, LAM PLAN does not grant any warranty regarding:

- the actual performance of the Products, other than their ability to meet the specifications set by LAM PLAN;

- the electronic components of the Products or their associated accessories, including but not limited to printed circuit boards and integrated circuits.

The customer is obliged to give LAM PLAN the necessary time and means to carry out the necessary repairs and/or replacements, failing which LAM PLAN's warranty will no longer be due to the customer.

LAM PLAN's warranty is, therefore, strictly limited as indicated above.

By express agreement, all damages of any nature whatsoever resulting from damage inherent in the defects of the goods are excluded from the guarantee.

9. Copyright

Ownership of copyrights for all documents in all classes is retained by Seller. Buyer is granted a license to make, without further approval by Seller, a limited number of copies, in whole or in part, of a document, so long as the copied portion includes the applicable copyright and trademark statements found on the original document.

The reproduction for promotional purposes of all or part of texts, images and graphic elements is strictly prohibited without the express permission of LAM PLAN.

10. Applicable Law

All provisions of these General Terms and Conditions of Sale are exclusively subject to French law with respect to the interpretation and enforcement thereof.

11. Assignment of Jurisdiction

Any dispute arising from the interpretation and / or enforcement of these General Terms and Conditions of Sale shall be subject to a process of discussion and consultation with a view to achieving an amiable settlement.

Failing such a settlement being obtained within a period of two months from the date the dispute was notified and acknowledged, the dispute shall be brought before the Tribunal de Commerce de Paris (Commercial Court of Paris) who will have sole jurisdiction in the matter.

This clause shall be applicable, including in the event of summary proceedings, fixed date petition hearings and proceedings, incidental claims, plurality of defendants or third parties, and without the possibility of any hindrance thereto arising from the jurisdiction assignment clauses contained in the client's documents.
